

# TRADE **YALE** MARK

## Economy and Quality—and Yale Products Made in Canada

When you go to your hardware dealer and buy a Yale lock or Yale Builders' Hardware—your money will be spent *economically* for a Canadian-made article.

You can be sure of *that*. Because you are getting that product at a moderate price and in a quality that is the standard of the civilized world for service, security, protection, durability, mechanical soundness, and material perfection.

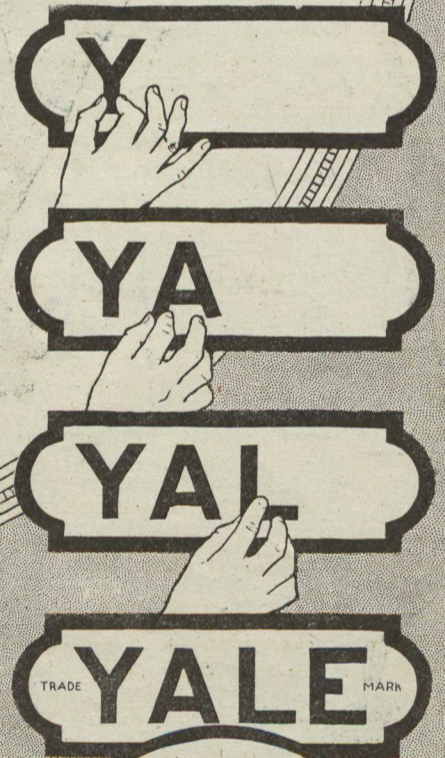

You are vitally interested in true economy; you are just as vitally concerned in true quality. You want a guarantee of

economy and quality in the locks and hardware you buy. You have that guarantee in the trade-mark "Yale." Look for it—see it on all Padlocks, Night Latches, Door Closers and Builders' Hardware.

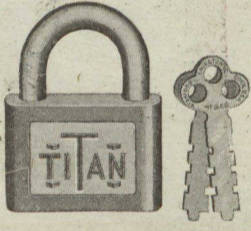

They are all Yale products—all made in Canada—all trade-marked "Yale". And by that trade-mark they are *guaranteed*.

*Yale Products Made in Canada For Sale by  
Canadian Hardware Dealers*

**Canadian Yale & Towne Ltd.,**  
St. Catharines, Ontario

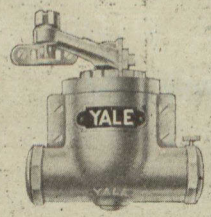

**Yale Padlocks**—of which one type is shown here—come in styles and sizes to meet every padlocking need or purpose. Sturdy, dependable locks. Yale padlocks are used throughout the world for every padlocking need inside and outside the house.

**Yale Builders' Hardware.** There are many designs in Yale builders' hardware—affording a wide range of choice, harmonizing with every architectural school, harmonizing with every school and period of architectural treatment, adaptable to every type of house. Proven protection, real decoration.

**Yale Door Closer**—master of the door. It controls and closes your doors always and quietly. It does away with the noise and jar and discomfort of uncontrolled doors. A necessity in homes. A bringer of comfort and better health.

**Yale Cylinder Night Latches.** Afford real security and certain protection. Convenient, deadlocking latches that cannot be forced or tampered with through the crack of the door. Used as the only lock or as reinforcement for a doubtful lock already on.
