

## Good Coffee Needs More Than a Recipe

You need also an Electric Percolator. Coffee is sure to be of excellent quality because the Electric Percolator is so scientifically constructed that no other result is possible. No eggs are needed to settle grounds. Simply pour in cold water, then the coffee, turn the button, and in a moment or two you have really one of the most delicious and fragrant cups of coffee you ever tasted—the kind you sometimes patronize a high-class grill in order to get.

Every coffee-lover and woman who aims to improve her coffee-making skill should arrange to see the Electric Percolator at once. Demonstration daily at our office. You are invited. Or, information will be given at the

COMFORT NUMBER, ADELAIDE 404.
