J. D. [unclear] Ottawa

Dear Sir

I have just completed survey and plan of Indian Reserve Fishus Grant County N. D. as directed on July 18th 1899

184632

Enclosed please find plan and vouchers

The lines and corners of this reserve seemed at first to be rather a difficult thing to define but by degrees things began to clear up a little, this deed and that one was searched, an old plan was found and a point marked Black Rock was located, this gave me a starting point, then again an iron bolt was found at the corner on Boat Harbour on the line running to Black Point and near the end of it we discovered a "dead" line several feet west of the line being run, this necessitated the changing of our course a little and running the line anew which led to the discovery of a few more blazed trees this again brought the line directly
