

viii. TABLE OF CONTENTS.

CHAPTER VII.—INTERRUPTERS.

Platinum Interrupters or "Breaks"—Mercury Breaks—
 Dipper and Jet Breaks—"The Morton Apparatus"—
 Bécclère's Break—Disadvantages of high rate of interruption
 —Centrifugal Interrupters—Dielectrics for mercury breaks
 —Electrolytic interrupters—Wehnelt and Caldwell types—
 Advantages of each type, and as compared with mercury
 breaks—Diagram of connections for the coil outfit—
 Advantages of control by shunt resistance where voltage of
 electrical supply exceeds 100. 73-89

CHAPTER VIII.—ACCESSORY APPARATUS.

Tube Stands—X-Ray Couches—Diaphragms—Changing box
 —Penetrometer—Wehnelt's Radiometer—Precautions in
 use—X-Ray protection of operator and patient. 90-100

CHAPTER IX.—RADIOSCOPY.

X-Ray proof Gloves—Fluorescent Screens—Method of
 using—Choice of tube for screen examination—Advantages
 of screen examination—Application to investigation of
 internal diseases. 101-105

CHAPTER X.—X-RAY PHOTOGRAPHY.

Advantages and disadvantages—Choice of tube for Radio-
 graphy—Management of Tube—X-Ray Photographic Plates
 —Development—Exposure—Secondary Rays—Penetration
 of rays for different classes of work—Intensifying Screens—
 Practical details—Instantaneous Radiography. 106-120

CHAPTER XI.—EXAMINING PHOTOGRAPHS.

Viewing Box—Atlas of Normal Radiographs—Fractures and
 Dislocations—Bone diseases—Arthritis—Malignant diseases
 —Abscess—Localisation of Foreign Bodies—Stereoscopic
 Radiography—Wheatstone's and other forms of Stereoscope
 for radiographs—Simple and efficient method of localisa-
 tion—Mackenzie-Davidson method. 121-134

CHAPTER XII.—REGIONAL RADIOGRAPHY.

The Head—The Face—Lower Jaw—Teeth—The Spine—
 The Atlas and Axis—The Dorsal Spine—Lumbar Vertebrae
 —Sacrum and Coccyx—Clavicle—Shoulder—Scapula—Arm
 —Forearm—Wrist and Hand—Hip Joint—Femur—Knee—
 Tibia and Fibula—Ankle.... .. 135-147
