YOU get more than paid, if you use your Cultivator steadily to mulch root crops, beans and corn from the very beginning. one of these implements for corn especially. The high axle construction allows continued cultivation until very late. Guard plates are provided so cultivation may begin the moment shoots appear above the ground, and narrow, medium and wide points meet every condition for which you need a Cultivator. Remember you cut down hoeing, and save time, with a Corn Cultivator.

FROST & WOOD "NEW AMERICAN" CULTIVATOR

Here's an implement with a fine record as a Corn and Root Cultivator. Can be used as a Field Cultivator by the addition of a centre section, easily bolted into place. As a Corn Cultivator it has two sections, each independent of the other. See vator it has two sections, each independent of the other. See the stirrups for operator's feet—and the way each section can be adjusted by him when cultivating uneven rows. Axles are also adjustable—can be regulated to work in any width of rows. The New American is well made throughout and particularly easy to handle. Is equipped with corn shields, and narrow, medium or wide teeth, so all kinds of cultivation can be done. Bean Harvester state-breast compiled set. Bean Harvester attachment supplied at a small extra cost

Let us send you a Catalogue with more information on these implements. A post card will bring it.
