

BOG SPAVIN

Cure the lameness and remove the bunch without scarring the horse—have the part looking just as it did before the blemish came.

FLEMING'S SPAVIN CURE (Liquid) is a special remedy for soft and semi-solid blemish—Bog Spavin, Thoroughpin, Splint, Curb, Capped Hock, etc. It is neither a liniment nor a simple blister, but a remedy unlike any other—doesn't irritate and can't be imitated. Easy to use, only a little required, and your money back if it ever fails.

Fleming's Vast-Pocket Veterinary Adviser describes and illustrates all kinds of blemishes, and gives you the information you ought to have before ordering or buying any kind of a remedy. Mailed free if you write.

FLEMING BROS., Chemists

Questions and Answers.
Miscellaneous.

A Boundary Tree.
A and B live on adjoining farms, the rail line fence being a little on B's land, but inside of fence on A's side. A cuts it down and into stove wood and draws it home at once. Had he any right to take it without consulting B? A since has set posts for a wire fence. If A had a legal right to the tree could B not have the same right to take the rails that are on his land? The fence has been there a good number of years.

Ontario. **W. P. C.**
Ans.—A had no right to fell the tree and appropriate it to his own use without permission from B.

Copper Kettle.
Please answer through the columns of your paper these questions. I have one copper kettle for sale, weighing 35 pounds and holds 30 gallons.
1. What is it worth a pound?
2. Where can I get sale for it at once?
O. B. A.

Ans.—1 and 2. Copper commands a high price on the market at the present time. The best and surest way to secure a purchaser for your kettle is to place an advertisement in "The Farmer's Advocate." This paper is a medium through which seller and purchaser are brought in touch with one another.

Separating Whey.
Would like to know, through the columns of your paper, the feeding value of whey after it has been separated as compared with whey which has not been separated. Would it be a paying proposition to instal a butter plant in the average-sized cheese factory for the manufacture of whey butter?
D. S. R.

Ans.—Authorities who have experimented with feeding whey to hogs find that when ordinary whey is combined with barley and corn, 1,000 lbs. is worth as much as 100 lbs. of cornmeal. Separated whey has about 25 per cent. less feeding value. Ordinary whey contains about 93.4 per cent. of water; .7 per cent. ash; .3 per cent. protein; 4.8 per cent. carbohydrates, and .3 per cent. fat. It is doubtful if it would pay to instal machinery for making whey butter in the average cheese factory. In some factories where it was installed it is little used. It takes a lot of whey to make one pound of butter.

Concrete Wall.
I am thinking of building a cellar under the mow of my barn. The mow is 14 by 24 feet, 16 feet high, and will hold about twelve tons. If I build my cellar walls of cement and make them 8 inches thick, can I put sills in the cement? Will it carry the weight? How much cement will it take to build cellar 20 by 14 feet, 8 feet high, with wall 8 inches thick? How should I mix the cement?
M. H. H.

Ans.—The sills could be laid on the cement, but, while an 8-inch wall may be strong enough, we would prefer it a couple of inches thicker. A one-foot wall is frequently used, and in your case we would prefer it. It would be necessary to set it on a solid footing. If the wall is built 8 inches thick, about 14 cubic yards of gravel and 12½ barrels of cement will be required. If 12 inches thick, 20 cubic yards of gravel and 17 barrels of cement, provided the concrete is in the proportion of one of cement to 8 of gravel. The gravel, sand and cement must be thoroughly mixed.

CONSUMPTION OF MUTTON IN DIFFERENT COUNTRIES.
The latest figures show that 1,139,000,000 pounds of mutton and lamb are annually consumed in the United Kingdom. This is more than the amount consumed by the three next mutton-eating countries combined. United States has more than double the population of the United Kingdom, and comes second in consumption of mutton; the total being 602,000,000 pounds. France is third with an annual consumption of 353,000,000 pounds. As yet Canadians do not rank high as consumers of this class of meat.

Why Pay Peddlers Twice My Price?

Look Out! WORMS!!

Hogs get sick and you don't know what's the matter. I want to tell you worms are the cause of many hog troubles. Here's the first great use of

Dr. Hess Stock Tonic

It Expels Worms

Try it on your shoats. A tablespoonful for each two hogs twice a day will do the business. Put it in the swill. Then look out for dead worms. See your shoats improve. A great conditioner—it cleans the system, gives appetite, improves digestion for cows, horses, sheep, hogs.

25-lb. Pall, \$2.25; 100-lb. Sack, \$7.00
(Duty paid). Never peddled. Sold by a dealer in your town.

Dr. Hess Dip and Disinfectant

destroys disease germs—makes health conditions for animals. A powerful disinfectant as well. Good for household use.

My Guarantee

So sure am I that Dr. Hess Stock Tonic will expel the worms from your hogs and keep your stock in sleek condition, that Dr. Hess Dip and Disinfectant will destroy disease germs and foul odors, that I have authorized my dealer in your town to supply you with enough for your stock, and if these preparations do not do as I claim, return the empty packages and my dealer will refund your money.

Dr. Hess Poultry Pan-a-co-a Tones up dormant egg organs and helps to make hens lay. Economical—a penny's worth enough for 30 fowls daily. 1½ lbs. 25c; 5 lbs. 85c; 12 lbs. \$1.75; 25-lb. pall, \$2.50 (duty paid). 1 guarantee.

Dr. Hess Instant Louie Killer Should be used freely in the dust bath for poultry. Destroys lice for 30 fowls daily. 1½ lbs. 25c; 5 lbs. 85c; 12 lbs. \$1.75; 25-lb. pall, \$2.50 (duty paid). 1 guarantee.
