Their high quality makes their low maintenance records possible

CANADIAN Independent Telephones have established remarkable records for low cost of maintenance on scores of independent telephone systems in Canada. Their high quality alone makes these records possible.

Canadian Independent Telephones are correctly designed to give the most efficient service on Canadian rural lines. Their construction has been simplified to such an extent that there is practically nothing about them to get out of order. The materials used are of the most lasting quality, and will give years and years of service.

Our telephones are strongly guaranteed for a term of years. In fact, everything we manufacture and sell is guaranteed first quality—and we supply everything to equip a rural, city or private inside system complete to the smallest detail.

Our No. 6 Bulletin fully describes our latest style of magneto telephones for rural party line service. You will find it interesting. It's free. Send for a copy.

* * * * *

We also manufacture the Presto-Phone—an automatic system for private inside

Use in Factories

offices, department stores, schools, colleges, hospitals, public buildings, etc.

This is the newest invention in private telephone systems, and saves the cost of a switchboard operator. No maintenance cost—its first cost is the only cost.

A folder explaining it will be sent free on request.

GREETINGS

Friends, we extend to you our sincere Christmas greetings. This is the third successive War-Time Christmas. Let us pray that the war will be brought to a successful termination before many months, so that we may have our brave boys in the trenches home with us for Christmas, 1917.
