Government Tractors

In order to encourage increased production at the least possible expense to the farmer, the Dominion Government has purchased 1000 Ford Tractors which are to be distributed by the Provincial Departments of Agriculture on and after April 1st. These tractors will have a drawbar pull of 1800 lbs. at plowing speed—2500 lbs. on low speed. On the belt they develop 22 H.P. at 1000 R.P.M. using kerosene. The price will be \$795.00 delivered anywhere in Manitoba, Saskatchewan or Alberta. Terms are cash with application.

Full particulars can be had from your Provincial Departments of Agriculture.

When you get the new tractor hitch a U.G.G. drill to it— make it a real one-man outfit

—an outfit that one man can handle at all times without leaving the tractor platform. That is where the U.G.G. Drills are different from all others. There need be no stopping at the ends—no raising or lowering by hand—no pressure adjustment every time a gang is lowered—this is all done by pulling a cord.

The hand levers are used only to adjust the gangs to desired depth you wish to sow. These drills are so constructed as to sow with a positive evenness, and to make a perfect seed bed. Many features such as the extra thin lower end of boot, rigid frame, pressure in front of the axle, etc., make for lighter draft than is usually found. Chilled disc bearings, perfect oiling system, wide clearance

between discs—all these come to you as regular features of these drills. Extension hopper, tractor hitch and control cords are furnished with each drill intended to be used with the tractor.

We can also supply these drills for use with horses, with the power lift and power pressure, at the same price.
