

WALTHAM WATCHES.

BRISBIN'S

AMERICAN CLOCKS

LISTOWEL STANDARD.

TOWN AND COUNTRY.

Mr. GEORGE TOWNSEND is at present on a trip to the Northwest.

SATURDAY and Sunday last were the hottest days this season.

LARGE numbers of lands continue to be shipped from this vicinity.

The Grand Lodge I. O. O. F. has been in session this week in Toronto.

MAYOR HAY, and Messrs. John Reid and Hugh Steele have returned from the North-west.

The large steam flouring mills lately run by Mr. F. E. Gibbs will be sold by auction on Tuesday next.

An excursion will take place on the Grand Trunk R. to Detroit, on the 17th inst. Fare \$2.00 tickets good for 10 days.

THE Provincial Exhibition will be held this year at Kingston, commencing Monday Sept. 18th, and continuing to Sept. 23rd.

G. W. R. N. C.—The fifth annual picnic of the G. W. R. B. and T. divisions of the G. W. R. will be held on the 26th inst. at Guelph.

Mr. Wm. King left for Manitoba on Monday with another car load of horses.

Messrs. KINGSBROS. have removed their boot and shoe store to Wallace street, where they will be pleased to attend to the wants of customers.

The citizens of Waltham will have their first railway excursion on Monday next, when there will be an excursion from that place to Stratford, under the auspices of the Waltham O.C.R.

MR. CHARLES A. VOORHEIS, the managing partner of the house of A. Vreder & Co., proprietors of the celebrated German remedy, St. Jacob's Oil, died at his residence, Baltimore, Md., on the 5th inst.

AT THE LACK.—Mr. W. E. Morphy, mathematical teacher in the Listowel High School, is spending a portion of his holidays in the Thousand Lakes region.

UP THE LAKES.—Mr. W. E. Morphy, mathematical teacher in the Listowel High School, is spending a portion of his holidays in the Thousand Lakes region.

CHRIST CHURCH.—On Sunday 26th inst. Rev. Mr. Maguire of Timbly in Christ Church, morning and evening, and at Shipley in the afternoon. The holy communion will be administered.

UNUSUALLY the best and most healthful drink for the hot days of field work is made of oatmeal, water and a little sugar. It will not only be found to refresh the thirst better but will impart more strength than any other drink.

LAW SOCIETY.—A Law Social will be given at the residence of Mr. A. D. Free man on Monday evening next. For those wishing to be indoors a pleasant entertainment will be prepared. A large attendance will add much interest to the occasion.

Messrs. JAMFORD, SMITH & Co., of this town, have the contract for building the English Church in Moorfield. It will be built of brick, with Gothic roof, and is designed to seat about 250 persons. The contractors expect to have it finished about the 1st of November.

CHARLES LEVINS, son of Mr. B.B. Jarvis, has been laid up for several days past from the effects of a bump in the face while playing ball at Hamilton on Christmas Holiday. His condition was considered critical, but we are pleased to state that he is now in a fair way to recovery.

HOLIDAY TRIP.—Rev. Mr. Bell of Knox Church, left on Wednesday on a holiday trip, which he will spend in the vicinity of Collingwood and the Parry Sound district. He will be absent about a month, returning by Mr. Henderson of Toronto.

The excursion on Friday last on the Great Western Railway to Niagara Falls and Toronto was a great success. Two train loads of excursionists participated. The excursion on the 4, T. R. the same day to Buffalo and the Falls was also well patronized. The Listowel Band accompanied the latter.

NEWSPAPER POSTAGE.—A great many people imagine the postage to be done away on newspapers altogether and consequently think they can forward their papers without cost. Such is not the case as the law only refers to newspapers issued from a newspaper office and sent to regular subscribers.

A FALLER.—The wild raspberry crop in this year pretty nearly a failure in this part of the country. It is supposed that the cold weather in the early summer did the work. The loss will be a large amount of money is made by picking and selling this delicious fruit.

SENT DOWN.—Alexander Ferguson, the rag trader who has recently committed to Stratford jail by Geo. Draper, Esq., J.P. for trial for the larceny of a watch from Mr. Chas. Coghlin of Elton, was tried on the 4th inst. before the county judge, found guilty, and sentenced to six months in the Central Prison. Ferguson has already served a term in the Central Prison.

HEARD OF SEA HULL FIRM.—An eccentric young man brought his affianced down from the country to see the sights. One day, while passing the confectioner's, he noticed in the window a placard bearing the announcement, "Ice cream—one dollar per gal." "Well," said the young man as he walked into the saloon, "that's a pretty near a dollar charge for one gal, but Maria, I see you through, no matter what it costs. Here's a dollar, water; ice cream for this gal."

TRY IT.—A correspondent sends the following recipe for cholera morbus, which he highly commends, and which may be handy to have in the house at this season of the year: "Take one gill of boiled milk, stir in a pinch of camphor, and one gill of water, and repeat the dose once in ten minutes till you get six or seven doses down. By this time the patient will be in a profuse perspiration, and you will see at once that he is all safe; at least, you will see enough to satisfy you to continue the practice."

ASALTI.—R. Hemphill, a somewhat notorious character, was brought before Geo. Draper, Esq., J.P., on Tuesday evening, charged with having assaulted Samuel McCutcheon of Wallace. The evidence of two or three respectable citizens, who had witnessed the assault, showed that Hemphill had come up behind McCutcheon and struck him on the back of the head, while the latter was engaged in a row with some boys in front of Woodley's stable. The blow knocked McCutcheon down, stunning him. McCutcheon was the worse of the blow, and was taken to the hospital at 10 and cost, or thirty days in jail at hard labor.

METEOR SHOWERS.—Had the sky been clear during the past night or two a fine display of meteors would probably have been witnessed, as the aurora borealis, now passing through that is known as the August meteor zone. Every year when the earth crosses the zone, about the 8th of August, there is a shower of meteors, more or less abundant according to the density of the cometary cloud. The meteors shoot from the constellation Perseus, which is the reason called the Perseid meteor showers. Sometimes the showers are very brilliant, almost rivaling the famous November ones. These meteors are distinguished from those belonging to other meteor systems by their yellow color, and they leave behind them trails of luminous vapour, and of eddies and swirls, which are called "comets." The best meteor shower of the year is the Perseid, which is clear, bright, and is seen in all parts of the world. It is the only meteor shower that is seen in all parts of the world.

"PERSEID ALLIANCE."—The first meeting of the "Alliance" to be held in the Town Hall on Monday evening 14th inst., to commence at eight o'clock. All the members are expected to attend, and members are expected to name some favorite subject on a slip of paper to be brought and placed in a box for the purpose, from which the subject will be drawn in the commencement of the meeting without choice, as called for by the president, and extemporaneous addresses delivered thereon as disposition and ability permit. Two or three good selections of vocal music will also be rendered by those appointed to that duty. Under the supervision of J. F. Fenwick, who has cheerfully accepted the position assigned him as manager of the choir, by the unanimous vote of the "Alliance." The notice of the meeting to all who have the welfare of the Society at heart are affectionately solicited.—Con.

MAJESTY.—Our newly appointed Justice of the Peace, George Draper, Esq., has literally been up to his ears in business, this week, dealing out justice in a manner that may not be all relished by evil-doers, but which every law-abiding citizen will appreciate. It is necessary to the peace and well-being of the community that rosyism and other social evils be punished and the law be enforced. Mr. Draper is the right man in the right place, and his strong arm will be a terror to the law-breakers and a comfort to the law-abiding. He is prepared to discharge his duties faithfully, such as things as an integral set of town By-laws, wherein many cases must necessarily be decided, is not likely to facilitate the carrying out of the law. We are informed by members of the legal profession in town that our town By-laws are very defective, some of them over others are defective in respect to penalties. It is the case, no time should be lost in rectifying them.

NIGHT BLOWING CHERRY.—A magnificent specimen of this indescribable fruit plant was exhibited last night at Langdon, the residence of Mr. Adam Brown. It is the property of Mr. Powell, the well known and most successful fruit grower in this city, who kindly placed it at Mr. Brown's disposal for the gratification of his friends. We cannot pretend to describe its beauty. To form an idea of its magnificence it is best to see it, and to see it in the full bloom of the flowers, which are closely watched. The plant is supposed to be the finest on the continent. There were thirty-three buds on it, and twenty-three of which bloomed and expanded in the presence of a large number of visitors last evening. The perfume was very powerful, and the whole was in a most beautiful condition. It was nearly midnight before the buds ceased their wonderful unfolding, and not a few friends remained to enjoy the sight. Mr. Powell is to be congratulated in possessing so valuable and attractive a plant.—Hamilton Spectator.

CIVIL HOLIDAY.—Thursday last was civic holiday in Listowel. Business was on the quiet, and those of our citizens who were so inclined, had their numbers were not small, took a day's outing. About 400 persons went on the excursion to Watkinson's, where they spent several hours very pleasantly in taking in the sights and the exceedingly attractive surroundings of the place. The steamer "Caledonia" took the excursionists out for a sail on Colpo's Bay, from the deck of which splendid view is obtainable of the magnificent scenery, which the landward part is so renowned. The music of the Listowel band, which accompanied the excursion, added to the pleasure of the day's outing. The excursionists returned home about 9 p.m. The excursion on the Great Western R. to Hamilton and the beach under the auspices of the German Lutheran church, also took place on Thursday last. The band of the 23rd Battalion, Walkerton, accompanied the excursion. After spending a pleasant day abroad, the excursionists arrived home safely before midnight.

PEAK EYE IN HORSE.—An authority says: "Beally, attention and good nursing are more essential than medicines in ordinary cases of this kind. When such a disease is dangerous, and all dietetic or reducing measures should be avoided. The horse should be kept in dry and well ventilated stalls, and the food should be light and clean. Cleanliness should be attended to. The body should be lightly blanket, and the legs hand rubbed and bandaged with flannel strips or hair. Exposure to drafts of air should be avoided. The food should consist of sweet aromatic hay, or newly cut grass, and occasionally ration of soft, warm feed or mash in small quantities. If there is any difficulty in swallowing, a mild, stimulating liniment, such as hartshorn liniment, should be applied to the throat. Setons, rowels and blisters should be avoided. The drink should consist of laxative tea. When such a disease is dangerous, and all dietetic or reducing measures should be avoided. The horse should be kept in dry and well ventilated stalls, and the food should be light and clean. Cleanliness should be attended to. The body should be lightly blanket, and the legs hand rubbed and bandaged with flannel strips or hair. Exposure to drafts of air should be avoided. The food should consist of sweet aromatic hay, or newly cut grass, and occasionally ration of soft, warm feed or mash in small quantities. If there is any difficulty in swallowing, a mild, stimulating liniment, such as hartshorn liniment, should be applied to the throat. Setons, rowels and blisters should be avoided. The drink should consist of laxative tea. When such a disease is dangerous, and all dietetic or reducing measures should be avoided. The horse should be kept in dry and well ventilated stalls, and the food should be light and clean. Cleanliness should be attended to. The body should be lightly blanket, and the legs hand rubbed and bandaged with flannel strips or hair. Exposure to drafts of air should be avoided. The food should consist of sweet aromatic hay, or newly cut grass, and occasionally ration of soft, warm feed or mash in small quantities. If there is any difficulty in swallowing, a mild, stimulating liniment, such as hartshorn liniment, should be applied to the throat. Setons, rowels and blisters should be avoided. The drink should consist of laxative tea. When such a disease is dangerous, and all dietetic or reducing measures should be avoided. The horse should be kept in dry and well ventilated stalls, and the food should be light and clean. Cleanliness should be attended to. The body should be lightly blanket, and the legs hand rubbed and bandaged with flannel strips or hair. Exposure to drafts of air should be avoided. The food should consist of sweet aromatic hay, or newly cut grass, and occasionally ration of soft, warm feed or mash in small quantities. If there is any difficulty in swallowing, a mild, stimulating liniment, such as hartshorn liniment, should be applied to the throat. Setons, rowels and blisters should be avoided. The drink should consist of laxative tea. When such a disease is dangerous, and all dietetic or reducing measures should be avoided. The horse should be kept in dry and well ventilated stalls, and the food should be light and clean. Cleanliness should be attended to. The body should be lightly blanket, and the legs hand rubbed and bandaged with flannel strips or hair. Exposure to drafts of air should be avoided. The food should consist of sweet aromatic hay, or newly cut grass, and occasionally ration of soft, warm feed or mash in small quantities. If there is any difficulty in swallowing, a mild, stimulating liniment, such as hartshorn liniment, should be applied to the throat. Setons, rowels and blisters should be avoided.
