METEOROLOGICAL. Roported for the Dominion Gov't by G. A. Blair, Esq. AUGUST. alum, aloee, and prune juice.

In making an ascension in a balloon at Brockville, On., on the 1st inst. Prof. Squires, the zeronaut, had a very narrow escape. When about 80 feet from the ground a current of air struck the balloon and drove it with such force against the spire of a church, that the air vessel was torn completely in twain. The netting of the cords caught on the spire, and the Professor hung down by it, alongside the steeple, not daring to move less he should be hurled to the ground, in which case certain death would have been the inevitable result. The excitement was intense—the ten thousand spectators holding their breath, expecting every second to see the man lose his hold and be killed. A young man gained access to the steeple, and passed a plank out of a hole in itabout five feet from the basket of the balloon.
