The Depth of the Ocean.—A very interesting letter from Capt. Denham, H. M. S. Herald, was recently read before the Royal Society. Capt. D. is engaged in a scientific royage and among other subjects he was particularly enjoined to endeavour on favourable occasions to ascertain the depth of the ocean. His letter gives an account of a deep sea sounding in 7,706 fadepth of the ceeds. His letter gives an ac-count of a deep sea sounding in 7,766 fa-thoms, in lat. 36:49 S and long. 37 6 W. The sounding was obtained on a calm day, Oct. 30, 1852, on the passage from Rio de Janeiro to the Cape of Good Hope The sounding line was 1-10th of an inch in diamet-er, laid into one length, and weighing, when dry, 1 lb for every hundred fathoms. Capt Denham received from Com. McKeever. Denham "received from Com. McKeever, of the United States" Navy, commanding the Congress frigate, 15,000 fathoms of this line, 10,000 on one reel and 5000 on another. The pluminet weighed 9 lbs., was 11 inches long, and 1-7th of an inch in diameter. When 7,706 fathoms had run off the reel, the sea bottom was reached. The plummet was drawn up several times 50 fathoms; and after it had renewed its descent, it stonged after it had renewed its descent, it stopped abruptly at the original mark to a fathom and would not take another turn off the reel. The whole time taken by the plummet in descending to this amazing depth, 7.7 geographical miles of 60 to a degree, was 9 hours 24 minutes and 45 seconds. The highest summits of the Himalaya are little more than 28,000 feet, or 4.7 geographical miles above the sea. The sea bottom has therefore depths greatly exceeding the elevation of the highest pinnacle above its surface. Great care was taken to show the nature of the bottom, but in reeling in, the line broke at 140 fathoms below the water line, carrying away a thermometer which had been attached to it at 3,000 fathoms. nding is the deepest that has ever been made on any previous occasion.

Winow's Down.-The Legislature of North Carolina has passed a law providing that when a man dies intestate, leaving a widow and no child or children, the widow is to have one half his personal estate. If the husband makes a will, and the widow diesents therefore while the precision one. lissents therefrom, she is to receive one

A FACT FOR FARMERS .- Dr. R. T. Baldwin has made public the result of several years investigation and experiments upon manures, and various ways of fertilizing the soil. He states that the best and speediest way to fertilize any soil, is to cover it over with straw, bushes, or any raw material, so astocompletely shade it. The surface of the earth thus being made cool, dark, damp and close, soon undergoes a chemical pr close, soon undergoes a chemical process like putrefaction, and becomes highly ferti-lized. This plan of fertilizing, he says, may be applied with success to any soil whatever, no matter how poor, and the result will be

The North Pacific fleet, of 1853, of Ame rican whalers, it is now ascertained, com-prise not less than 286 ships. This number exceeds that of any previous year, except 1846, when the fleet consisted of 296 ships.

INTERESTING PACTS .- Man has the power of imitating almost every motion but that of flight: To effect these he has, in maturity and health, 60 bones in his head, 60 in his thighs and legy, 62 in his arms and hands, and 67 in his trunk. He has also 434 muscles. His heart makes 64 pulsations in a minute, and therefore, 3840 in an hour, 92,160 in a day, There are also three complete circulations of his blood in the short space of an hour. In respect to the comparative speed of animated beings and of impelled bodies it may be remarked, that size and construction seem to have little influence, non-his comparative strength, though one holdy giving any quantity of motion to another is said to lose so much of motion to another is, sain to tope so much of its own. The sloth is by no means a small animal, and yet it can travel only 50 paces in a day; a worm crawls only 5 inches in 50 seconds; but a ladybird can fly 20,000,000 s its own length in less than an hour An elk can run a mile and a half in seven minutes; (an antelope a mile in a minute; the wild mule of Tartary has a speed even greater than that. An eagle can fly 18 leagues in an hour, and a Canary falcon can even reach 250 leagues in the short space of 16 hours.—A violent wind travels 6) miles in an hour; sound 1142 English s in an hour; sound 1142 English

Stormo Parsas, As eschange says:
"When a man gets mad and stops his paper, he always forrows the next number of his neighbour, to see if the wildrawal of his patronage has nt killed the editor and dressed the columns in mourning. This ressed the columns in mourning. This rows out of the fact, that none try to show heir spite in this way but the kind of people the imagine that the world rests upon their houlders. The research and treat upon their houlders.

The ordinary mode of churning butter in Chili, is to put the milk in a skin—usually a dog skin—tie it on a donkey, mount a boy on him with rowels to his spurs about the langth of the animal's cars, and run him four-mile heats. Ordin the state of the skill beauty and run him four-mile heats.

Wood is the thing, after all, as the man with

deal-leg suid, when the mad dog bit it.

I'm the light of the eye, the capport of the held. The next is isolated to me for its bread. The arms of their freedom can beast, I must own: But wos to the legs. If Leave them alone. I'm gristed that follows, and in year years. Am suce to be found, and he sign of the tengue. The arms and trained on a the sign of the tengue. The arms and taken the wind go, and hend so my rule; And, without me, the none would appear but a foolide every book, whether trilling or saigh. I make the said of each page, and a leaves to the control and politics it distinct now a fend, And am quite awaren'd to the chaste as the rule; Although not a deater. I'm food of a feet and after the chaste as the rule; Although not a deater. I'm food of a feet and after the chaste and of the chast can be rule; I have you to snewer my riddle, good friend.

BELLS! BELLS! BELLS! THE Subscribers manufacture and keep constantly on hand, all sizes of Church, Factory, Steamboat, Ferry, Locomotive, School House and Flantston Bells, with the fest description of Hangings.

These Bells are made from the best stock, and the small sizes undergo the same process in manufacturing as Church Bells. An experience of thirty years, with a great many recent improvements, and an entirely new method of casting, enables us to obtain the most melodious tone, combining also, in astrondiury

most metodious tone, combining also, in extraordinary vibration.

Nearly 9,000 Bells have been cast and sold from this Foundry, which is the best-evidence of their maperiority. We have fifteen Gold and Silver modalat our office, which were awarded for the "best Bell for sonorousness and purity of tone." We pay particular attention to the getting up Peals or Chimes, and can refer to those furnished by us. "Gereauthilisment is contiguous to the Eric and Champlain Canala, and Ruilroads running in every direction, which brings us within four hours of New York. Cash paid for old Copper." Old Clocks, Levels, Compasses, Trauste, Theodolites, Sci. Jersels, Compasses, Trauste, All communications, either by mail or otherwise with have immediate attention.
