Guelph Evening Mercury

WEDNESDAY EVENING, MARCH 4, 1874

Town and County News

REMEMBER the annual meeting of the Guelph Tract Society in St. Andrew's Church this evening.

Mr. JOHN GRIEVE, of Bramosa, a few days since sold a thorough-bred heifer, three years old, to Mr. Alex. Barnett, of Garafaxa, for \$200. The animal had been previously advertised for sale in the Mercury.

SUCCESSFUL OPERATION.—On Monday Dr. Cowan cut a fatty tumor from the side of a gentleman in town. It weighed 14 oz. The operation was performed under the influence of chloroform. The patient is doing well.

THE LATE MR. HISHOLM.—The remains of the late Mr. T. C. Hisholm, whose body was on Sunday found in the North River, New York, have been conveyed to Oakville, to which place he belonged. The funeral will take place from there to-morrow afternoon.

SALE OF THOROUGH-BRED STOCK.—We call attention to the advertisement of the great sale of thorough-bred cattle, sheep and pigs belonging to the estate of John Snell, Edmonton. The superior quality of the Snell stock is well known all over the Province. Those requiring first-class animals should attend the sale.

BASE BALL.—A meeting of the Victoria Base Ball Club, of Antioch, was held at their club room on Saturday, the 28th, and the following gentlemen were elected officers for the ensuing year:—Mr. J. Nicklin, President; Mr. D. Lozier, Vice-President; Mr. F. H. Storey, Secretary; Mr. A. Treasurer; Mr. F. Kennedy, Field Captain.

PRESENTATION IN HESPELER.—On Saturday evening, after the employees in Randall, Farr, & Co's Woolen Mills had finished their week's labour, they gathered in one of the large rooms of the mill, and Mr. E. Masgrave, in their behalf, presented G. F. Cliff, Esq., who has been superintendent of the mill ever since it was opened, but who is now going to the United States with the firm—a very beautiful and valuable clock, accompanied with a magnificent silver case basket for Mrs. Cliff, expressing at the same time their regret that they could not go with them to their new location.

The Poultry Show. Guelph, March 4. Last night the show was formally opened to the public. The weather was very disagreeable, rain and sleet were in abundance. Notwithstanding this, from 70 to 80 persons visited the show—a very satisfactory number under the circumstances. The judges commenced their work soon after two o'clock yesterday afternoon, and finished this forenoon. The birds are all in place, and they make the drill shed ring with their shrill notes. One "fowl" did not appear to like his confinement; it was a fine bald-headed single, captured on the 12th January, on Lot 7, Con. 11, Guelph Township, by L. K. Day. He glared on the visitors with his fierce unwinning eye, and made futile efforts to soar through the roof of his coop.

The show as a whole is superb, and some of the birds are really matches. In the classes of Brahmas, Cochins, games, Dorkins, Houdans, and Crevecoeurs, most of the birds are not only beautiful individual specimens, but are pure in breed. Silver Pencilled Hamburgs as a class are rather inferior, as there do not appear to be a perfect specimen in the show. The display altogether shows great enterprise on the part of the fowl-fanciers, as all the most recent breeds are represented by good specimens. Any one wishing to make a selection for his own poultry yard has an excellent opportunity here, as he sees the fowls at a time when he can form an opinion of their capabilities for standing the Canadian winter. Several very fine birds have evidently too much comb and wattle to be profitably propagated or used in Canada. The collection of geese and turkeys is a beautiful one, and it is doubtful whether finer specimens could be seen in this continent. The ducks are of course nearly all Aylesburys and Rouens, and are also admirable specimens, some of them nearly as big as geese. Perhaps the finest feature of the show is the large breeds of fowls. Dorkings hold their own thoroughly useful fowls, and we are glad to see so large a number of them exhibited. It shows that "fancy" is combined with a sufficient idea of "utility." Black Spanish are numerous and fine. The appearance of the wattles and combs show, however, the difficulty of rearing them in this country. Pigeons are of course nearly all Aylesburys and Rouens, and are also admirable specimens, some of them nearly as big as geese. Perhaps the finest feature of the show is the large breeds of fowls. Dorkings hold their own thoroughly useful fowls, and we are glad to see so large a number of them exhibited. It shows that "fancy" is combined with a sufficient idea of "utility." Dorkings hold their own thoroughly useful fowls, and we are glad to see so large a number of them exhibited. It shows that "fancy" is combined with a sufficient idea of "utility." Black Spanish are numerous and fine. The appearance of the wattles and combs show, however, the difficulty of rearing them in this country. Pigeons are of course nearly all Aylesburys and Rouens, and are also admirable specimens, some of them nearly as big as geese. Perhaps the finest feature of the show is the large breeds of fowls. Dorkings hold their own thoroughly useful fowls, and we are glad to see so large a number of them exhibited. It shows that "fancy" is combined with a sufficient idea of "utility."
