

Men's Stylish Summer Wearing Apparel at Prices Within Reach of All

Buying a suit of clothes is not an every-day affair—a fact that makes the man of small income use considerable discretion and judgment. When buying a suit, you want one that not only wears well, but one that will FIT and LOOK well for an indefinite period: a suit that you can depend on to keep its shape. The clothing kept in stock is guaranteed to do this, because it is made of only the finest finished worsteds and tweeds procurable, thoroughly sponged and shrunk, and tailored by hand. You will readily see what it means to you as a money-saving instrument when purchasing your clothing here, inasmuch that the same suit made by custom tailors would cost half as much more. Not only are the materials of the most favored patterns, but the workmanship could not be surpassed

Prices Range From \$15.00 to \$18.00

DR. YOUNG BACK FROM NORTH

Brings News That Coal Has Been Discovered at Southern End of Atlin Lake

PROSPECTS GOOD IN NORTHERN B.

Winter Work Was Satisfactory and Backward Spring Favored the Work of Mining

That coal has been discovered at southern end of Atlin Lake with indications signifying quantities sufficient to make it a valuable find, is the news brought back today by Dr. Young, provincial secretary, who, since June 1, has been visiting his constituents in Atlin district.

The indications are not new, according to Dr. Young. That coal existed that section has been known to part interested for some time, but it is only recently that the indications have become so convincing as to warrant development on a large scale. Manager McKee, who has charge of the work, is now taking in machinery, and purpose of spending up O'Donnell Creek.

Dr. Young's trip was not only satisfactory and reassuring, it was extremely pleasant as well. He enjoyed the finest weather conditions all the time he was in the North and returned this morning with a more firmly convinced that prospects for that region are as bright as those of any section of the Canadian Empire.

"How about your health, doctor?" Evening Post asked at the close of an interesting talk.
"Never has been better," Dr. Young replied. "That is a great country indeed. We had the finest kind of weather all the time I was in the North. It was delightful and I enjoy every moment of it."

Prospects Are Good.

Speaking of the outlook for the summer in the Northern country, Dr. Young said that in Atlin the prospects were exceptionally good. The winter work was satisfactory and although the spring was backward that fact favorable to the mining work, only had feature Dr. Young noted was the breaking of the dam on Sturgis Creek on June 18th. This break allowed all the water stored during the winter to escape. This was a considerable detriment to the summer work. Manager Ruffner is doing great work in making the best of the situation. The mine was the best equipped in America, Dr. Young said. It has fourteen monitors working and was exceptionally well equipped. Manager Ruffner immediately took steps to pair the damage. When Dr. Young one pit with four monitors was in swing and another pit, almost equipped, was to have been opened following day. The reconstruction of the injured section of the dam was begun at once.

"The work on the McKee Creek is solidified as going well," said Dr. Young. "Manager Hamshaw completed the establishing of one of the most modern hydraulic plants in the country and he looks forward to a satisfactory summer."

"Individual miners, while they are a very experienced lot of men, they are doing excellent work in the district. The quartz propositions being well developed and in conjunction with the quartz work at W. Arm, where there is a concentration look for an important season of work."

Feeling optimistic.
"The feeling in the north is optimistic. While there are many adverse circumstances to contend the prospects warrant continued investment."

"The work on Birch, Otter Wright creek is proving very satisfactory and at Hazy Hollow, in the north work is proceeding very well indeed. There is an English concern already and an American concern is preparing now to enter the field. The road into the mines just been completed and is being proved. The United States government spent \$125,000 on the section of road from Haines to the boundary of the provincial government, built rest, the shorter portion, at a cost of \$3,000 to \$10,000. The English company will begin the shipment ore at once."

"On the way down I was at R. for a short time. The feeling is optimistic in the extreme and the people seemed to be very sanguine. school population there is increasing and on the northward trip I authorized the building of an additional room to the school building. This will necessitate the engagement of two teachers after the summer vacation. Dr. Young said very little politics. Asked as to the party's prospects in the north he said that he had not discussed politics to any extent. He held several meetings in various parts of the district for the purpose of keeping in touch with his constituents but politics were left out for the part."
