

STANLEY'S PATENT COAL-HEADING MACHINES.

Some of the advantages as compared with hand labour are:—It greatly reduces the wages cost. Does work in one-fourth the time. Leaves much firmer roof. Economises use of timber. Renders explosives unnecessary. Ventilates its own head while tunnelling.

These machines are now working at a number of collieries in England, Scotland and the Colonies; in the United States, and in several Continental countries.

Full particulars with prices and copies of testimonials, on application.
