JOHN HAGGART, Auctioneer.

#### INFORMATION WANTED.

Timber manufacturers who have received circulars from the publishers of this journal asking for information to assist us in the preparation of our annual review of the lumber trade, will confer a favor by supplying the data at as early a date as convenient.

#### CURRENT TRADE CONDITIONS.

ONTARIO.

Activity still pervades the lumber trade of Ontario. So much lumber sold weeks ago still remains in the mill yards that shipments will be made by rail throughout the entire winter. It is said that some mills have several million feet yet to move. Numerous enquiries for stock are being received, but in some instances orders have been rejected owing to inability to supply the lumber required. For next season's production business is progressing very favorably. It was reported that Watson & Todd had purchased the cut of W. C. Edwards & Co.'s mills in the Ottawa valley. It is now learned that the purchase includes all of the first, second and third quality white pine deals and 70 per cent. of their red pine. The same firm are also reported to have purchased next season's production of white and red pine deals of the Hull Lumber Co. and A. A. Buell & Co., as well as the red pine deals of the Pembroke Lumber Co. and A. & P. White, of Pembroke. Manufacturers report numerous enquiries from Great Britain for red pine, and the prospects are that the price of this lumber will be higher next year than in the past season. The lath situation remains unchanged, the available supply being far short of the demand, and prices gradually stiffening. In hardwoods some contracting for next season's production has taken place, and, as far as can be learned, the prices represent a slight advance over the figures paid for similar stock last summer.

QUEBEC AND NEW BRUNSWICK.

It is little wonder that the lumbermen in the eastern provinces are increasing their operations in the woods this winter, as they have been given every encouragement by the course which prices have taken during the past two months. The mills are cleaned out of dry stock and manufacturers are daily refusing orders for coarse pine, spruce and hemlock boards. Spruce clapboards are the only stock that is not constantly enquired for. These are low in price and difficult of sale. Next season's production of several of the large mills in Quebec have been purchased by the shippers, Dobell, Beckett & Co. and W. & J. Sharples figuring prominently in the transactions. The prices represent an advance on last year's figures, one sale being reported of 3x9 thin spruce, for first open water shipment from Quebec, at about 35s advance upon last year's quotations. This, however, is an exceptional figure, and notwithstanding the strength of the market, is a greater advance than manufacturers should expect. Early shipments will be the rule next spring, as some mills will saw during the winter as soon as there is sufficient snow to get logs out. Up to one week ago unfavorable weather had been experienced in some parts of New Brunswick and Nova Scotia, thus increasing the cost of logging. Notwithstanding this, we judge from reports to hand that the production of logs this winter in the Maritime provinces will be fully one-third greater than last season.

MANITOBA AND BRITISH COLUMBIA.

The higher prices on white pine lumber, as announced by the Lake of the Woods manufacturers some weeks ago, have been firmly maintained. By the new list all timber and dimension stuff was advanced \$1 per thousand, and boards, shiplap, flooring, ceiling, siding and fencing \$1.50 per thousand. It is said that dealers have also been informed that no more orders for No. 2 dimension white pine can be taken by the mills for immediate delivery. Lath is quoted in Winnipeg at \$2.75 retail, but the tendency is towards higher prices, and it is predicted that \$3 will be reached before the spring. Dealers throughout Manitoba have been notified of an advance of \$1 per thousand in the price of British Columbia shiplap, fir and cedar. The demand for lumber at this season is remarkably good, and orders for next year's delivery are being booked. From this it would appear, that retailers and consumers do not expect that lower prices will rule in 1900. There is every prospect of a large production of white pine logs this winter, and it is probable that operations will be commenced on some of the limits in the Rainy River district purchased last week from the Ontario government.

UNITED STATES.

The general shortage of lumber in the United States has induced some manufacturers to inaugurate winter sawing, but as the lumber so cut will not be ready for the market until late in the spring, winter prices are not likely to be affected. The great shortage in stock applies chiefly to low grade pine boards. It is said that sales of No. 4 boards have been made at Duluth on the basis of \$12 per thousand. No. 3 boards have sold as high as \$13.50 for next season's delivery. At Tonawanda there is a great scarcity of 1x8-inch, 10-inch and 12-inch box and No. 2 and No. 3 barn, and prices have advanced from \$1 to \$2 per thousand feet.

Dealers are putting forth every effort to purchase 1x10 inch and 12 inch stock, to be shipped in by rail during the winter. Lately the demand for cutting up stock has improved, and prices are likely to advance. There is a good stock of inch fine common and shaky clear, and on these grades some shading of prices is reported. The lath market is as firm as ever. In Chicago No. 1 white pine lath is selling at \$4.50 and \$4.75, and No. 2 about 25 cents less. The demand for hardwood is rather quiet, as manufacturing plants have shut down for the holiday season. White ash is scarce and very firm in price. Sales of maple have been made at Buffalo at about \$22 for inch and \$25 for thicker.

FOREIGN.

One question under discussion in British lumber circles is where the present advance in prices is going to end. Each day the price of some class of timber is marked higher, and in comparison with the prices of one year ago, there is a considerable difference in favor of those now ruling. Prices for spot goods have strengthened in sympathy with the high prices asked by shippers for next season's
