THERE is no secret or patent in the production of "Myrtle Navy" tobacco. It could be produced by any manufacturer, but no manufacturer could make it pay at that price, unless he could purchase on a large scale and sell on a large scale. He could not sell below the present price without a loss even if he could purchase on the lowest advantageous terms. To get a large market, therefore, without which he would have no inducements to go on, would be the work of many years. That is the reason why Messrs. Tuckett & Son have the command of the market, and they are wise enough to know that they can retain it only by keeping the price down to hard pan figures.
