

ANNEXES

ANNEXES

1. DEFINITIONS

- A. Definitions related to hazardous chemicals
 - (a) "Acute toxic chemicals" means chemicals which have a median lethal dose which is greater than 5.0 mg/kg (subcutaneous administration) or 1,000 mg-min/m³ (by inhalation) and less than or equal to 10 mg/kg (subcutaneous administration) or 10,000 mg-min/m³ (by inhalation) when tested by the method described in (b).
 - (b) "Other acute toxic chemicals" means any [toxic] chemicals not covered by (a) or (b) above, [including toxic chemicals which normally cause temporary incapacitation rather than death] [at similar doses to those at which super-toxic lethal chemicals cause death].
 - (c) "Other harmful chemicals" means chemicals which have a median lethal dose which is greater than 10 mg/kg (subcutaneous administration) or 10,000 mg-min/m³ (by inhalation).

ANNEXES

- B. Definitions related to hazardous chemicals
 - (a) "Key Process" means
 - a process which poses a significant risk to the objectives of the Convention by virtue of its importance in the production of a toxic chemical.
 - It may possess, [possess] the following characteristics:
 - (i) It may play [play] an important role in determining the toxic properties of a [toxic chemical] [produced by the Convention] [super-toxic lethal chemical].

1/ The final placement of these definitions within the Convention will be decided at a later stage.

2/ It was noted that after such measurements had actually been performed, the figures obtained in this and the following sections might be subject to change in order to carry out the work under the Convention.
