experiences. Look Forward to It.

"After all," said one husky first-year youth, "we don't mind a little bull dozing from the seniors, because we look forward to doing something like it ourselves the next year on others. And it is these things which help to make residence life at the University more enjoyable." Still, all week students who were

present during Monday night's occur-rence have been appearing before the University faculty, who met yesterday afternoon, and whose action, if any was determined on, was probably an ounced to the boys last night by Dean. But as to what the announ ment was, as said above, the authori-ties and the boys themselves are as mum as the proverbial claim.
