

# MELODEON & COTTAGE ORGAN EMPORIUM

GEORGE STREET, PETERBOROUGH.

JOSEPH. R. WALTON, AGENT.

[ Estey's Perfect Melodeon and Cottage Organ, established in 1846, (formerly Estey & Green,) the only Manufactory, on this Continent, of the Perfect Melodeon and Cottage Organ, with Patent Base Damper, Patent Harmonic Attachment, and Patent Manual Sub-Base. These inimitable instruments have won their way to public confidence purely on their merits, and not by force of extensive advertising and purchased recommendations.

Our recently constructed Cottage Organ, without the attachments, is unsurpassed by any Reed Organ or Harmonium of the size; but, with the Harmonic Attachment and Manual Sub-Base, it is pronounced by competent judges to be far superior to any other instrument of the class in the World. Its power, sweetness and variety of tone, simplicity of construction, and ease of management, recommend it to everyone as being all that is claimed for it, both for the Parlor and the Church.

The Harmonic Organ, for Churches and Public Halls, has a fine, powerful Pedal Base, with Independent Reeds; and, with the Harmonic Attachment, is believed to be the most powerful Reed Organ made, being nearly equal to a Pipe Organ of three times its cost.

*All our Instruments are made in the most thorough manner, and warranted in every respect.*
