

THE MAN WHO SAYS HE
IS GOING TO STOP THE WAR

Portrait of Henry Ford, who has chartered the Scandinavian line steamer, Oscar II, and will sail in a few days with an assemblage of prominent American men and women pacifists in an effort to induce the belligerent nations to establish peace by Christmas Day. Photo taken at the Billings Hotel, New York, November 24.

CAN GERMANS STAND
RUSSIAN WINTER?

Paris Figuring When They Will
Retreat—A Study of Temperatures

Paris, Oct. 23.—(Correspondence)—Predictions that the winter will be very severe have inspired comparisons between the German campaign in Russia and Napoleon's Russian campaign of 1812.

Abbe Moreaux of the Bourges observatory points out that a curve indicating the European localities where the average temperature in January is zero Centigrade or 32 above zero Fahrenheit would pass along the coast of Norway, protected by the Gulf Stream from greater cold, ascend abruptly along the west coast of Denmark, and follow a line considerably westward from Berlin, turning eastward in the region of Trieste to the Black and Caspian Seas.

Another curve marking a zone where the average temperature is 14 degrees above zero Fahrenheit would comprise Berlin, Vilna, Riga, Drinsk, Moscow and Petrograd. To make up this average, however, zones of greater cold are comprised, the maximum at Petrograd being 28 below and at Moscow 47 below zero Fahrenheit.

Examining the situation from a meteorological point of view, Abbe Moreaux finds confirmation of the predictions of

naturalists in reviewing the natural return of periods of extreme cold in the past. We are approaching, in his opinion, a period of cold winters, and he thinks that the German soldiers may experience the same vicissitudes as those that cost Napoleon 400,000 men from the "Grand Army."

Larry, who wore a thermometer during Napoleon's Russian campaign, has left records showing that as early as Nov. 14 the "Grand Army" had to endure a temperature of twelve below zero Fahrenheit on the line from Vilna to Moscow—the retreat having begun Oct. 19.

War News in Last Night's Cables

London, Nov. 29.—The campaign in the Near East is about to enter a new phase, upon which the visits of Lord Kitchener to Paris and Emperor William to Vienna, it is believed, will have an important effect.

Lord Kitchener, after visiting the Balkans and Italy, has arrived at Paris for an important series of conferences with the French staff, while the German Emperor has gone to Vienna to see Emperor Francis Joseph and discuss with the Austrian generals what the next move will be. Presumably, it is a question whether the Central Powers will attack the Anglo-French forces in southern Serbia, or concentrate in Western Bulgaria, to meet the threatened Russian invasion from the east and the possibility of Rumania taking sides against her old enemies, Bulgaria and Turkey.

So far as Serbia is concerned, winter appears virtually to have put an end to any important movements, although the Austrians are proceeding to deal with the Montenegrins, whose frontier they have crossed while the Bulgarians are attempting to advance to Prirend, and Monastir.

Desperate fighting continues on the summits around Gorizia; the Italians claim to have captured more Austrian trenches, but the Austrians declare that the attacks all along the Isonzo have been repulsed.

Artillery and aerial fighting has marked the progress of events in France, while in Russia an almost complete lull prevails. In the Caucasus a recrudescence of activity, however, is reported, Petrograd recording several scouting expeditions.

After clearing the battlefield at Caisiphon, near Bagdad, in Mesopotamia, the British have again withdrawn to the river. The Turks report that the British were forced to retire by reason of counter-attacks, after suffering very heavy losses.

Artillery engagements, in which the British monitors took a hand, continue in the Gallipoli straits.

It is reported from Rome that Austria is seeking a separate peace with Italy. This is not generally credited, although in some quarters the German London, Nov. 29.—A despatch to the Exchange Telegraph Company from Copenhagen says:

"The Wolff Bureau (the semi-official German news agency) says that several members of the Vienna cabinet will resign.

London, Nov. 29.—Reuter's Amsterdam correspondent forwards the following:

"The Telegraf is informed on good authority that serious rioting took place last Saturday in Berlin, in which several thousand women gathered before the imperial castle and demanded the return of their husbands from the front and improvement in food conditions. The crowd finally was dispersed by the police.

"No confirmation of this Amsterdam despatch has been received here."

London, Nov. 29.—Canadian and Australian soldiers, with a sprinkling of British territorialists, this evening took charge of Memorial Hall, where the Union of Democratic Control, an organization which is opposed to conscription and favors peace, was advertised to hold a meeting, and unceremoniously threw the speakers from the platform and turned the gathering into a recruiting meeting.

London, Nov. 29.—A German submarine, attacked by a British seaplane at Middelkerke on Sunday, was sent to the bottom, according to the official report of Field Marshal Sir John French, which was given out by the press bureau tonight. The submarine, says Field Marshal French, was kept to break in half. The British commander further reports much activity on the part of the artillery and the aircraft, no less than 15 encounters in the air taking place on the 29th.

Forty-Four Steamships in Head in June—Quick Delivery Sought Rather Than Cheap Prices

Kobe, Japan, Nov. 29.—(Correspondence)—No visitor who enters Kobe by sea can fail to observe the great activity in shipbuilding at this port. The most heavily capitalized shipyards in Japan are located here, and all its docks are filled with work. Three large ships and many smaller ones are in course of construction.

In June there were forty-four ships, aggregating 188,000 tons, in the hands of Japanese builders, and the tonnage has increased considerably since that time, although the exact figures are not available. All Japanese shipyards have orders which will keep them at high pressure for more than a year. The scarcity of cargoes, while the demand for ships is increasing, has thrown much business into the Japanese shipyards.

The shipyard at Osaka is reported to have nearly 100,000 tons of steel ships in course of construction. It is estimated that the shipyard at Kobe, in course of construction here in Kobe, and smaller yards in various ports probably have a tonnage of 20,000 under way.

Prices for ships have risen at amazing rates. Freight is computed at practically every important port in the Far East. In giving orders the shipping concerns inquire about the speed with which a commission can be executed rather than the charge. It is rumored that the shipyard at Osaka is now being sold and bought at a high premium by those interested in shipbuilding transactions.

NOT LIEUTENANT GOLDBERG.

Lieutenant Val. Lambert-Godberg, secretary of the officers' mess of the 69th Battalion, is disposed to resent the way in which his name appeared in the published list of officers. It was there set down as Lieutenant Goldberg, and he has been receiving letters to that address.

CANADIAN MUNITIONS WORK

Ottawa, Nov. 29.—The Dominion Shell Committee has ceased to exist, and the "Imperial Munitions Board" has been appointed in its place, directly responsible to the British ministry of munitions. The reconstruction board has as its head, J. W. Flavell, of Toronto, who will act as chairman with executive and administrative powers.

General Alex. Bertram, former head of the committee, will in future hold the position of deputy chairman with the following officers comprising the board: Hon. Col. David Carnegie (member of former committee), G. H. Dawson, C. B. Gordon, J. A. Vallancourt and E. R. Wood, the latter four being new members.

Brass will also shortly be made in the country on a considerable scale. A great impetus has likewise been given to the manufacture of explosives, nitro-cellulose powder, tri-nitrotol and salubrite are now being produced on a large scale, and at moderate prices.

How To Make the Quickest, Simplest Cough Remedy

Much Better than the Ready-Made Kind and You Save 25c. Fully Guaranteed

This home-made cough syrup is now used in more homes than any other cough remedy. Its promptness, ease and certainty in counteracting distressing coughs, chest and throat colds is really remarkable. You can actually feel it come the ordinary cough—relieves even whooping cough quickly. Splendid, too, for bronchitis, spasmodic croup, bronchial asthma and winter coughs.

From any drugist 2½ ounces of Pinex (50 cents worth), pour it into a full pint of water, add 10 ounces of plain granulated sugar syrup. This gives you a bottle of cough syrup that you could buy for \$2.50. Takes but a few minutes to prepare. Full directions with Pinex. Tastes good and never spoils.

You will be pleasantly surprised to note how quickly it loosens dry, hoarse or tight coughs, and how the inflamed membrane in a painful cough. It also stops the formation of phlegm in the throat and bronchial tubes, thus ending the persistent loose cough.

Pinex is a most valuable concentrated compound of genuine Norway pine extract, rich in quinine, which is so healing to the membrane.

To avoid disappointment, be sure and ask your drugist for "2½ ounces Pinex," and don't accept anything else.

A guarantee of absolute satisfaction, or money promptly refunded, goes with this preparation. The Pinex Co., Toronto, Ont.

Civilization's Great Menace

Constipation is civilization's great menace, and nearly every adult suffers more or less from its devastating influence. Millions of dollars are expended each year for salts, calomel, pills, etc., to relieve this condition.

How much better people would be if they were to cut out the drugs and eat a good bowlful of Dr. Jackson's delicious Roman Meal each morning! This is a natural laxative food, and most nutritious known, designed by a prominent dietetic specialist. Ask your physician about it. It is guaranteed to relieve constipation or "money back." Follow directions on the package carefully in making porridge. Don't stir.

Sold by all live grocers at 10 and 25 cents.

RUSSIA EQUIPPING
2,000,000 MORE MEN

Need Now is Rifles, Says American in London—Scandinavians Become Wealthy

London, Nov. 29.—(Correspondence)—"Russia is now suffering only for want of rifles, and when she is properly supplied at least 2,000,000 additional soldiers will be thrown into the field with results which only next spring's campaign can tell."

This is the opinion of a prominent American mining engineer who has just returned to London after spending six months in the Russian Empire, mainly in Siberia, where he is the chief engineer of an important group of mines. Describing conditions in Russia, he said:

"The depression which prevailed outside Russia during the great German drive through Poland was never really duplicated in that country. Domestic troubles existed as always, but the people have made their power felt as never before and the only thing that could cause revolution now would be the conclusion of an unfavorable peace with the Central Powers."

"The people of Russia are enjoying something in the nature of a boom, and the cost of living of the Russian peasant, who does not require luxuries, has not appreciably increased. The Russian peasant is not an imaginative individual, and the losses suffered in the war have not greatly impressed him."

"Besides, the losses incurred in the great retreat were unbelievably small when the magnitude of the fighting is taken into consideration."

"Even the generally admitted shortage of rifles, the waste of which has been unprecedented, is not causing the Russians much concern, as the staff has realized that the rifle used by infantry is not an effective arm. The Russian army is now well supplied with heavy guns and munitions and the infantry is being supplied with thousands of machine guns."

"In attacking the Russian infantry, almost invariably detaches the bayonet from his rifle and uses it as a knife when he leaps into the German trenches. He has even been known to discard both rifle and bayonet, relying on a club to win a trench."

"For the greater part of the war we have used Austrian prisoners as miners in our mines, but lately we have been receiving Germans from the Government Prisoners' Labor Bureau. These Germans in the main are absolutely unfit for

hard labor, most of them being old men with grey beards, while others are of the student class, many of them wearing glasses with thick lenses."

"A staff officer, who is closely connected with the prisoners' bureau, told me that for some time on the Drinsk front the Russians have been capturing from 100 to 200 women weekly. These were all in German uniform and were apparently serving as soldiers."

"In the Scandinavian countries nothing was talked about except the food shortage in Germany, and some confirmation of this was given to me by a Dane, who represents in Berlin one of the biggest American packing companies. This Dane told me that England was supplying its prisoners in Germany with food."

"Shipping owners in the Scandinavian countries are making enormous fortunes out of the war, and it is said that in Bergen alone this industry has created twenty-seven new millionaires since hostilities began."

Never neglect what at first seems to be but a slight cold. Your head becomes stuffed up; you start to cough; an irritation in the throat follows; it gets lower down; settles on the lungs; you start to raise phlegm of a greenish, yellowish color sometimes streaked with blood, and you cough persistently.

You think, perhaps you are strong enough to fight off this trouble, but colds are not easily fought off in this northern climate. Colds if not attended to will sooner or later develop into some serious lung trouble.

Mrs. Willis H. Monk, Lower Ship Harbor, N.S., writes: "Last winter I took a severe cold on my lungs, and I would cough and spit up phlegm a month, and I got medicine from the doctor, but it did me no good. I thought I had consumption. My friends advised me to use Dr. Wood's Norway Pine Syrup, which I did, and it gave me great relief. I am the mother of ten children, and I always keep a bottle of Dr. Wood's in the house. I will highly recommend it to all, especially to all who have little ones to care for."

Dr. Wood's Norway Pine Syrup is the best cure for coughs and colds. It has been on the market for the past twenty-five years. It is put up in a yellow wrapper; three plain trees the trade mark; price, 25c and 50c.
