

Explanation of Calendar Pages.

The ordinary tables of the changes and quadratures of the Moon are given at the head of each month respectively, calculated for the longitude of Montreal, and at the right hand corner the time of Sun on Meridian or noon mark. The 1st and 2nd columns to the right of the Calendar give the mean time of the rising and setting of the Sun. The 3rd column shows the Sun's declination S. or N., and the fourth gives the Moon's place on the Zodiac. The rising and setting of the Moon are given in the fifth column, with sufficient exactness for all practical purposes. The weather prognostications are calculated according to the table of the celebrated Dr. Herschel.
