

Don't Depend on Car Service! "STAYPUT" All-Steel Portable Granary

Capacity
1000
Bushels

Weight
1200
Pounds

DIAMETER 13-ft. 8-in. WALL 8-ft. HIGH

The only upright portable granary built consisting of sixteen sections and a like number in the roof. It is easily erected. The only tool required is a wrench. We guarantee that one man can set it up in less than an hour. Very few bolts are required and these are placed in the angle iron frame **NOT ONE IN THE STEEL**. The cupola on the top of the "Stayput" granary may be raised or lowered to get the necessary amount of air for ventilation.

FOURTEEN SPECIAL FEATURES

Portable—All steel fireproof—All steel frame—Reinforced interior construction—Reinforced roof—Interchangeable sections—Easily erected and taken down—Interlocking joints on interior—Flat tight—Exclusive bunker board system—Roof bolted solid—Bolted to platform—Cannot blow away—Lasts a lifetime.

Price only \$110.00 f.o.b. Winnipeg. We are manufacturing a limited number this year. Place your order early. The "Stayput" is built by a reliable firm you can depend on to render good service. Write for further particulars and circular "G" today.

Biggest \$110.00 value in the West

Fall Plowing Wins Out in Western Canada!

Fall Plowing Needs POWER—this power is supplied by the UNIVERSAL FARM TRACTOR

The LIGHT WEIGHT with the BIG PULL

It is a three-wheel machine with its whole tractive effort concentrated in one big drive wheel, 60 inches diameter, with a 20-inch face. This wheel runs on the land, not in the furrow, thus giving it the best possible grip in travelling. By carrying the driver on the land a direct pull is obtained thus eliminating side-draft which would otherwise have to be met by complicated hitches that mean trouble and a big waste in power.

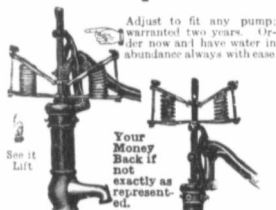

What the MANITOBA UNIVERSAL will do for you

- (1) It will pull 2 14-inch Plows in breaking and 3 in stubble at a speed of two miles per hour.
- (2) It will pull a 24-disc drill, an 8-foot cultivator or a 10-foot disc harrow.
- (3) It will pull an 8-foot harrower 24 miles per hour—24 hours a day if necessary.
- (4) It will haul a 4-ton load on practically any road with ease.
- (5) It will drive ANYTHING requiring belt power up to 2 1/2 horse-power.

now and have water in
abundance always with ease

Your
Money
Back if
not
exactly as
represented.

It makes the hardest working pumps work easy. It can be adjusted to lift any weight desired, from about fifteen to two hundred pounds, by turning the nuts at the top ends of the levers. It can be applied to all pumps that have verticals either cast iron, iron or wood, all lengths of strokes. It will make your pumps work so easy that a child can operate them. Your windmills will pump more than double the amount of water, for they will run in lighter winds. The days of light winds are the days the most water is needed.

Power, and Type and Size of Axle

Cuddy Patent Steering Device

Big Engines have gone out of favor. Their place has been taken by small tractors. One reason being the small tractor is easier to steer. If you own a big Engine make it just as easy to steer as a small one by purchasing a Cuddy Patent Steering device. At the price below it is a winner for you.

Our regular price is \$100.00 each, but we will sell a limited number—\$49.00 new and fully guaranteed at
