

PURE BRED PIGS FREE

PIGS GIVEN AWAY

Have you won any pure bred pigs the past year, for the securing of new subscriptions to FARM AND DAIRY? If not you can easily do so this spring. Read our offer below.

We will give a pure bred pig, of any of the standard breeds, from six to eight weeks old, with pedigree for registration, for only **seven new subscriptions to FARM AND DAIRY** at \$1 a year each.

Secure pure bred stock and weed out your old scrubs. Send for sample copies at once.

Circulation Department, **FARM AND DAIRY**, Peterboro, Ontario

"Success" Light Draft Roller Bearing Manure Spreader for 1909 is greatly improved

Just to the Paris Plow Agent in your locality and examine the New 1909 "Success" Manure Spreader. You'll have no doubts about which machine to purchase after you've seen it and noted the improvements for 1909.

The drawing below illustrates the New Gear Case enclosing the Apron Driving Mechanism. The case is cut away so that you can see the Worm and Gear, which run in oil. This case not only prevents all "leakage" of oil but dust-tight, too. This oil-tight, dust-proof case around Worm and Gear makes the apron driving mechanism of the "Success" the smoothest and easiest-running, lightest-draft on any manure spreader. And as the Worm and Gear are so fully protected against wear they are rendered practically indestructible.

But just see the "Success," and note all its superior features. That's the right thing to do before making your choice of a manure spreader.

THE PARIS PLOW CO. LIMITED.

PARIS, ONTARIO

Western Agents: The John Deere Plow Co., Ltd., Winnipeg, Regina, Calgary and Edmonton. Agents for Quebec and Maritime Provinces: Frost & Wood Co., Ltd., Montreal, Quebec, St-John N.B.

LAND FOR SETTLEMENT

Lands are offered for settlement in some cases **FREE**, in others at **50 CENTS** per acre, in various districts in **NORTHERN ONTARIO**.

Write for information as to terms, homestead regulations, special railway rates, etc.

THOS. SOUTHWORTH,

Director of Colonization, Toronto

HON. JAMES S. DUFF,

Minister of Agriculture.

The bottom drawing shows Beater with Roller Bearing at end of Beater shaft. There is also another Roller Bearing at other end of Beater Shaft. These bearings make the "Success" Beater a marvel for smooth and easy running—and materially decrease the draft. There are three other sets of Roller Bearings on New "Success." (Any Paris Plow Agent will show them to you). Their use lessens the draft of "Success" by at least one horse.

The large Black Teeth shown on end of Beater are the Harpoon Teeth. These Harpoon Teeth cut up the long pieces of straw that would otherwise wind around the end of the beater and clog it up. And this is just another draft-decreasing feature found on no spreader but the "Success."

A FAVORABLE INVESTMENT

The skim milk calf is as good as the new milk calf, provided Herbageum is in his skin milk. Herbageum will help horses digest their feed and fit them for the strain of spring work. Young chickens and turkeys escape disease and death by the use of Herbageum. It pays well to feed Herbageum to all farm stock. Herbageum is not expensive. There are 25 feeds in a 50 cent package. That five feeds for one cent. One feed is a feed for three young calves. A 50 cent package is sufficient for one horse for four months.

DON'T BUY GASOLINE ENGINES UNTIL YOU INVESTIGATE "THE MASTER WORKMAN"

school engine, superior to any one-cylinder engine, revolutionizing power. Its weight and bulk are half that of single-cylinder engines, with greater durability. Comes in 10 and 15 H.P. sizes. Light, compact, practical, economical. Cheaper mounted on any type of chassis. Write for literature. **THE TEMPLE FURN CO., Mfrs.,** Member and 1648 N. W. Chicago. This is OUR FIFTY-SIXTH YEAR.

City Milk Supply

Mr. W. K. McNaught's bill for the appointment of a commission to investigate and report upon the conditions under which milk is produced in Ontario for human consumption has passed the Legislature and the personnel of the commission will likely be made known at an early date.

For a couple of years there has been some agitation, mostly in Toronto, for some further legislation regulating the milk trade. When it came down to the point of devising legislation to meet the situation it was felt that there was not enough information about milk and the conditions under which it is produced to deal intelligently with the matter. Hence the commission.

Supplementary Estimates

Agriculture does not share to a very large degree in the supplementary estimates brought down in the legislation. Out of a total of over \$417,000, agriculture receives \$72,300, made up of a grant of \$3000 to agricultural societies in Northern Ontario; \$250 to the Ontario Corn Growers' Association; \$450 for experimental work in cheese factories and creameries; an addition of \$4,000 for field crop competitions, and \$4,600 for extended work in teaching agriculture in High Schools.

It is the intention to establish three more agricultural bureaus similar to those located at Wilby, Perth, Galt, Collingwood and Essex, and for this purpose this last item of \$4,600 is appropriated. It is probable that one of these bureaus will be located near Toronto, one in the east and one in the west.

The increase for field crop competitions makes the total appropriation for this work \$7,000. The marked progress these competitions have made is shown by the grants for the different years. In 1907 it was \$1,000; and in 1908, \$3,000, with 47 societies competing. The number of societies which shall be allowed to compete in 1909 is limited to 100. The Superintendent of Agricultural Societies expects that the limit will be reached this year. A feature of interest this year will be the grain in the sheep competition to be made at the Canadian National Exhibition. Societies desiring to enter the competitions should file their applications with Supt. J. Lockie Wilson before the first of May. As the Agricultural Societies Branch will not have the co-operation of the Seed Branch at Ottawa in judging the crops, the expense of conducting the work will be increased.

The Holstein Sale at Ancaster

One of the most important and successful sales of pure bred Holstein cattle that has taken place in recent years was held on Thursday last, April 1st, at Brookholm Stock Farm, Ancaster, Ont., the home of Mr. S. Stevenson & Son. The prices realized, apart from the profits from the products, go to prove what can be done by judicious selection and breeding. All the individuals were raised by Mr. Stevenson himself. This goes to show what a large profit can be made from Holstein-Friesians. There were 30 head of pure bred and six head of high grades brought to the hammer, which was wielded by Major Welby Almas, of Brantford, who was assisted in the ring by Mr. J. W. Richardson, of Caledonia, and by F. T. Durieu, of Peterboro. The returns totalled \$5547, which averaged over \$184.00 a head.

That noted rise, at the head of this

Fence Friends

Every buyer of Peerless Fence becomes a friend of ours because Peerless fence saves him trouble, money and time. **PEERLESS Woven Wire** is made of all No. 9 Steel Wire well galvanized. **PEERLESS FENCE** requires very few tools, and you save money on the net cost of your fence.

PEERLESS

The Fence That Saves Expense

One of the reasons why **PEERLESS Woven Wire** fence is so popular is because of the **PEERLESS** quality. It holds securely and without sagging the wire, yet there is just enough flexibility to prevent snapping from shocks, changes in temperature or from any other cause. Stock cannot get through it—under it or over it. There are many advantages in buying **PEERLESS FENCE** in preference to others that we have not room in this advertisement to tell you of them.

Your name on a postal brings you our new printed matter, containing much useful information in regard to fencing. Write for it today.

West Lorne, Ontario

ANCHYLOS

The modern treatment for **BONE SPAVIN AND RING BONE**

(1) It will not injure or eat into the parts or kill hair.

(2) Your horse may work after the third day.

(3) Guaranteed to cure; has never failed.

(4) It produces anchylosis of the joint, which your veterinary will tell you is the only cure.

To introduce my remedy in Canada I will mail it to any address for one dollar.

I believe a practical test of the Remedy in each locality is all that is required.

The above price will only last a short time; take advantage of it now, delays are dangerous.

Address: mentioning this paper.

J. A. McLARTY,

Manufacturing Chemist, THESSALON, ONT.
