Amatite on Blinds, of R. J. Abbey, Essex, Vt.

Amatite ROOFING Needs No Painting

AMATITE roofing is weaned. It doesn't need to be watched over and fussed with and cared for.

It takes care of itself from the start. As soon as it is laid on your roof, you can go away and forget about it.

You don't have to paint Amatite every two years as you do the "rubber" kinds. Amatite has a mineral surface which needs no painting.

The mineral surface is better and more durable than many coats of paint.

Back of the mineral surface is a layer of pitch, the greatest waterproofing compound known. Back of the pitch is a layer of felt (a whole ready roofing in itself), and behind this is another layer of pitch

and another layer of felt. The result is a strong, durable roof which can take care of itself in any climate without painting.

We will be glad to send you free a sample of Amatite Roofing so that you can see for yourself just what it looks like. Address our nearest office.

Everjet Elastic Paint

Low in price. Great in durability. Invaluable for prolonging the life of ready roofings, fences, iron work, etc.

Creonoid Lice Destroyer and Cow Spray

It will keep flies away from the cows. It will keep lice and mites away from the poultry, make everything sanitary and increase their output.
