Population of Fifty Million For Canada

Advantages Greater for Growth Now Than They Were in U. S. in Last Century—Canada Should go Ahead in Industries Also

(By-Write Magazine for June.)

Mr. J. S. Dennis, assistant to Lord Shaughnessy, president of the Canadian Pacific Railway, is a man in the Canadian reputation as an expert on land settlement and immigration matters. More than ordinary importance therefore, attaches to his prediction as to the course of development of Canada after the war.

Speaking before the Credit Men's Association in New York, recently, Mr. Dennis made the following remarkable forecast:

At the present time the vast area contained within the boundaries of the Dominion of Canada is occupied by a population of less than 8,000,000 people. Nature however, has been very bountiful in her gifts of natural resources to the Dominion and the ultimate development of these natural resources will, without question, result in the growth north of the international boundary, within a comparatively short time of a national neighbour whose family will comprise at least 50,000,000 people.

Fifty millions of people! It seems almost a glowing forecast. Yet if we will consider the matter for a moment we shall see that Canada possesses in a pre-eminent degree all the factors that make for rapid growth to a nation of this size.

Up to the beginning of the present century, development on this continent was largely monopolized by the United States. The exploitation of the natural resources of the United States and the settlement of American lands, put the development of Canada into the background for the time being. Not only were emigrants attracted from all over the world to the United States, but thousands, yes millions, of people emigrated from Canada to the neighboring republic.

But just as the 19th century was America's century, so the 20th century is Canada's.

The backward swing of the pendulum has already begun. With vast lands made upon its natural resources, with its lands well settled, and with a population exceeding 100,000,000, the United States no longer offers the opportunities to the land-hungry that it did. That role has been passed on to Canada, and the past few years have witnessed the phenomenon of a large and growing immigration into Canada from the United States—it reached 300,000 in the ten year period ending in 1914.

This is true of both the agricultural and the industrial population. If

SGT. DUNCAN MACNEIL
Says Dr. Cassell's Tablets Cured His Dyspepsia Completely.

Sergeant Duncan MacNeil, of the Canadian Expeditionary Force, writing from Europe (his home address is 114 Pleasant-st., Halifax, N.S.), says: "For six years I suffered from frequent attacks of dyspepsia, often being in bed for days at a time. When the war broke out I joined the Canadian Expeditionary Force and came to England. I had not been long there, however, when my old trouble returned, and I had to go to hospital. While in hospital a friend told me of Dr. Cassell's Tablets and I decided to try them. The first box brought such pronounced relief that I continued the treatment. To make a long story short, a complete cure was effected."

A free sample of Dr. Cassell's Tablets will be sent to you on receipt of 5 cents for mailing and packing. Address: Harold P. Ritchie and Co., Ltd., 10, McCaul-st., Toronto.

Dr. Cassell's Tablets are the surest home remedy for Dyspepsia, Kidney Trouble, Sleeplessness, Anaemia, Nervous Affections, Nerve Paralysis, Palpitation, and Weakness in Children. Specially valuable for nursing mothers, because they contain no poisons of life. Sold by druggists and storekeepers throughout Canada.

Prices: One tube, 50 cents; six tubes for the price of five. Beware of imitations said to contain hypophosphites. The composition of Dr. Cassell's Tablets is known only to the proprietors, and no imitation can ever be the same.

When we remember all this, and remember how vast are our undeveloped resources in fisheries, timber, minerals and water-powers, we can hardly help agreeing with Mr. Dennis that a population of 50,000,000 people for Canada, within a reasonable time is well within the bounds of possibility.
