Permanent Muscular Strength

There is this to be borne in mind in these days when so many young men are giving so much attention to physical development, in gymnastic and athletic exercises, that there cannot be permanent muscular strength where there is not blood strength.

The Proper Treatment for a Sprained Ankle

As a rule a man will feel well satisfied if he can hobble around on crutches two or three weeks after spraining his ankle, and it is usually two or three months before he has fully recovered. This is an unnecessary loss of time, for in many cases in which Chamberlain's Pain Balm has been promptly and freely applied, a complete cure has been effected in less than one week's time, and in some cases within three days.
