CHILDHOOD AILMENTS

Ailments such as constipation, colic, colds, vomiting, etc., seize children of all ages and the mother should be on her guard against these troubles by keeping a box of Baby's Own Tablets in the house. If any of these troubles come on suddenly the Tablets will except these troubles come of the little one is given an occasional dose of the Tablets he will escape these troubles. The Tablets are sold by medicine dealers or by mail at 25c a box, from The Dr. Williams' Medicine Co., Brockville, Ont.

Anything But Confidential.

Uncle Joe Cannon writes a very il legible hand, and when a member of Congress received a letter from him one day he was able to read but a single word. He disliked to bother Mr. Cannon, so he went to several friends among the congressmen and finally the letter, except for one word,

was made out.
This word seemed very important, as it was underlined, but as neither the congressman nor his friends could make it out he thought he would con-suit Mr. Cannon himself. He told him of his trouble in reading the letter and explained that with help from several other members of the House he had

made out all but the word in question. Cannon looked at his letter, and then at the congressman, and then again at the letter, his face meanwhile taking on a peculiar expression. Finally he looked at the congressman and with mingled anger and laughter said: "Why, you fool, that word is confidential!"—Exchange.

DIAMOND TESTING.

The File or a Sapphire Make Best Instruments.

How to tell real from false diamonds is briefly explained by a contributor to a

How to tell real from false diamonds is briefly explained by a contributor to a Vienna journal. In the first place, he says, real brilliants may be recognized by their great hardness and high refractive index, which are not found together in any imitation stone. The diamond stays brilliant because it is hard, while other stones and imitations become scratched and dulled by friction.

Fo: an experienced eye it is not difficult to decide from the appearance of the facts whether a stone is genuine or not. for those of real diamonds are seldous so regular as those of fine imitations. With the latter the greatest care is taken, in grinding, to smooth and polish not only the facets, but also the whole form into such a shape as to avoid differences in the reflection, refraction and scottering of the rays.

In the grinding and polishing of real brilliants, on the other hand, effort is made to keep the original size as nearly as possible, and some little irregularities in the facets and angles are preferred to any diminution in weight. In the imits tions the superfluity of cheap material, which may be wasted without making any difference, enables a perfect counterfeit to be made.

A necessary tool for testing is the file, which is not able to Injure or, scratch is real diamond, while on an imitation squickly makes its mark. Better than he file is a fragment of sapphire because he sapphire is not able to Injure or, scratch is real diamond. Any stone that can be certched with a sapphire is surely not he made to the diamond. Any stone that can be certched with a sapphire is surely not he made is done to a glass imitation the non spreads out at once. A diamond in the stone remains clean and dry. If the same is done to a glass imitation to a sheet of white paper one single point will be seen clearly. If several points aparent of a blur is seen it is an imitation. The will especially. If several points aparent of a blur is seen it is an imitation. The will especially. If several points aparent of a blur is seen it is an imita

Dripping.

Dripping.

What is dripping?
Dripping, as everybody knows, is the strole food of the young British litterateur. George Gissing and his heroes all fed on bread and dripping till success smiled on them. George Moore was once a drippingite. The poet, Alfred Noyes, is said to resort to dripping when his poems have bad luck.
Yes, everybody knows that dripping is supposed to be the pulces, the savory essences, that falls from roasting meats. That is the supposition. But what really is dripping—the dripping that the poor of England buy by the pound and smear up their bread in lieu of butter? The duestion, berhaps will never be answered, but a partial colution is given to it by the fact that a London poorhouse recently bought, at \$7 at on, 32 tons of dripping from—a soap works! Alfred Noyes used to tell a d story. "A little boy." he would begin, "com-

tory.
"A little boy." he would begin, "com-lained bitterly about the bread and rivoing that formed his daily break-

dril-Ding that formed his daily break-fast,
"It'll kill me.' he whined at last." Iknow it'll kill me."
"Kill you? What do you mean?"
"Why. I've been feeling pretty bad lately, and now I know it's all this drip-bing what's 'the cause of the trouble, I read it in a book."
"Some pure food rubbish. I dare say! And what, precisely, did you read in this vile book, silly?"
"I read. whined the urchin, 'that constant dripping wears away a stone,"

A Woman's Message to Women

If you are troubled with weak, tired feelings, headache, backache, bearing down sensations, bladder weakness, cons-tipation, catarrhal conditions, pain in the sides regularly or irregularly, bloating sides regularly or irregularly, bloating or unnatural enlargements, sense of falling or misplacement of internal organs, nervousness, desire to cry, palpitation, hot flashes, dark rings under the eyes, or a loss of interest in life, I invite you to write and ask for my simple method of home tratinent, with ten days trial entirely free and postpaid, also references to Canadian ladies who gladly tell how they have regained health, strength and happiness by this method. Write to-day. Address, Mrs. M. Summers, Box 8, Windsor, Ont.

Forestry Facts.

A new bulletin is now available at the Forestry Branch, Ottawa, cescribing some simple and inexpensive methods of preserving fence-posts from decay. It has been found that the generous application of hot creosite to well-seasoned posts stripped of bark, even when only painted on with a brush, will add at least ten years to the life of the least durable woods. Many common Canadian woods which hitherto decayed too are idly a yearly and a yailrapidly so used are thus made available for fence-posts. The saving in first cost and transportation more than balances the cost of treatment, while the cost of placing the post will be much less when considered as an annual charge.

Stopping ground-fires in the forest by trenching can now be easily and quick-ly done by planting a long string of dynamite cartridges in advance of the fire, at intervals of two feet. When evoloded simultaneously by means of an electric current, the result s a ditch four feet wide and two feet deep, which effectually stops the fire.

The ghostly glimmering of popular chips and stumps, frequenntly observed in Canadian forests at night, is due to a fungus known as the 'shoe-string' fungus, which is commonly found on large-sized poplars throughout Canada. It causes a yellowish white rot which detracts much from the value of this wood. The presence of this fungus is externally indicated by the mushroom-like fruiting bodies which cluster around the large of the trees. Infected trees the base of the trees. Infected trees should, when possible, be cut down and used for fire-wood.

cally trained foresters in the permanent employ of the Dominion Forestry Branch.

Over 789,000,000 shingles, one-half of the entire shingle production of Canada in 1912, were manufactured in British Columbia. Western red cedar was used exclusively.

The library of the Forestry Branch. Ottawa, contains over 1.200 volumes and more than 4.500 photographs of forestry work in Canada and elsewhere.

PRINCIPLES NEED PUSHING.

No principle, however, good or however strong in its appeal, can make progress without organized effort on the part of those who believe in it. Its merits must be brought to the attention of the people and organized action urged. Democracy develops with popular intelligence, and cannot be armanently based otherwise.

Lack of Fear in Animals.

When walking recently along a path traversing the west slope of Gullane Hill, writes a correspondent, a rabbit riddled waste, I caught sight of a young wild rabit, sitting complacently in an off-track, which did not move an inch on my drawing near. My interest was my drawing near. My interest was roused and more so when farther ap-proach brought it within handling dis-tence. Still it showed no alarm, and it did not seem in the least way put about when I lifted it up for inspection ,nor on being laid down again did it make any hurry to escape, but hobbled off clowly for some yards before breaking into a brisk run. On continuing my walk I found the rabbits would sit quite peacefuly till approach was made directly to them, when they popped down their burrows. On another occasion a little inland from the same place I came across a thrush busily occupied champing on a stone by the roadside. It, like the rabbit, made no very serious objec-tions to being handled; but when re-leased it took a rude departure, venting its shrill alarm cry. Such behavior may be common in the more secluded parts of the country, but surely it is rare so near civilization.—Sheffield, Eng., Independent.

An Ordeal.

The air was calm, they were alone, No sound disturbed the pair, He stood beside the damsel, Was seated in the chair.

He placed his hand beneath her chin, Then lifted up her face,
And gazed upon the maiden fair,
Who was so full of grace.

Her pleading eyes, so soft and true, Were raised in mute appeal, She glanced around in sheer despair, Her grief was all too real.

He touched her lips and softly spoke, Intending to be kind. "I'll draw the tooth at once," he said. 'Twill greatly ease your mind!"
Pearson's Weekly.

Invariably results when you use a cheap corn salve. Be judicious, use "Putnam's," for fifty years it has cured corns and warts that nothing else can touch. Ask for Putnam's Painless Corn Extractor, only, 25c at all dealers.

SOCIAL DYNAMITE. (Chicago Tribune)

Employers in England are profoundly worried by the strike movements of the day. They are worried by labor lead-ers of the tvpe of Jim Larkins, who speak of raising "the fiery cross" and urging all of England in a great strike. plurging all of England in a great strike. According to dispatches, the employers of the United Kingdom are now raising a find of \$250,000,000 with which to shield thruselves from these strike waves.

The employers of the United Kingdom and oubt are brainy men. But brainy men, too, may ofter have their sight obscured. Apparently the rift between the heads of British industry and the men who labor is too wide to permit the employers even a remote glimpse at the lives ployers even a remote glimpse at the lives and into the homes of the working class

and into the homes of the working classes. "All is heaven compared to the horrors of the Dublin slums." Jim Larkin asserted in a speech the other day. What is true of the slums of Dublin is true of the slums of London and other cities. Conditions which make slum life worse that iail are social dynamite. They cruse the explosions which are called general strikes.

Afund of \$250,000 000 is a lot of money. It may go a long ways in breaking up strikes. But the breaking of a strike does not mean the abolition of slums. If anything a broken strike makes the slums slummier. A period of aborted labor wars only sharpers class antagon-ism.

A Bad Cough Cured **Entire Loss of Speech**

Strange Case in Windsor, Ont.

Windsor, Ont., Nov. 20 .- Miss Counwindsof, Off., Nov. 20.—Miss Counter's case will prove of great interest to every one trouble with sore throat, bronchitis or weak lungs.
When asked for a statement Miss Counter said: "About seven years ago I contracted a heavy cold that settled on my lungs and resisted all treatment. After I had tried several doctors here and specialists in Detroit without benefit, I went to my druggist, Mr. D'Avignon, and asked him for the best remedy non, and asked him for the best remedy he had for cold on the lungs. He recommended Catarrhozone, which cured my cold in one week. It brought back my voice, and I have ever since been free from my old trouble. For coughs, colds and lung trouble I am sure that Catarrhozone is the best remedy. It goes right to the sore spot, gives quick relief, and makes a lasting cure."

(New York Herald)

The football season is over. More than a dozen deaths have been reported and some hundreds of injuries more or less serious, and not a few of which will undoubtedly handicap their victims for life What are the corresponding advantages for which so considerable a sacrifice is made?

for which so considerable a sacrifice is made?

Apparently these are rather hard to find. In both the army and the navy, where the after careers of athletes can be followed carefully, the report is that athletes are shorter lived, are more liable to develop the disease or neart and arteries which bring on premature senility and are in general distinctly less fitted for their work in after life than their non-athletic fellows. The excuse for football, as for other serious attention to inter-collegiate athletics, is that it makes for healthy bodies, which are quite as important as healthq minds. We now have the demonstration that it detrimental to health of body.

Faculties everywhere complain that it diverts attention from study and definitely disturbes scolarship. They every one admits.

Why, then, does it continue? Is the

ly disturbes sections.

admite.

Why, then, does it continue? Is the principal reason the fact that it attracts large crowds, just as did the spectacles of amphitheatre at Rome or a prize right does in out time? It would be worth while having the answer to that question—Why?

ANTI-KISSING. (Montreal Daily Mail)

(Montreal Daily Mail)

There have been, sporadic attempts made ti unite men, women, children and cats in a movement to banish klssing. That deadly germs may be transmitted in klssing is al. wrong and wholly unjustifiable. But the trouble is that people do not klss from the hygienic standpoint. There are other standpoints—and sit-points. Hygiene is not the whole thing. Besides, the young man in love is apt to consider it a duty to remove the deadly germs from his sweetheart's lips. He may endanger himself, but what of that? Has chivalry passed entirely out of the world, that the lover no longer may take upon himel; the danger that threatens his lady love? Must he sulk away and ceave her at the mercy of the deadly germs, when by kissing he may save her and sacrifice himself?

by kissing he may save her and sacrifice himself?

The deadly germ is accepted as an actual fact. Then what sort of creature is it, calling itself a man, that will eave a charming girl a helpless victim to it, when by perisiting kissing the deadly germ might be kept on the jump until worn cut and made harmless? The deadly germ theory only adds all the more reason why men should thish to the wonan's rescue. Self-sacrifice is sweet in such a cause.

Exporting Queen Bees.

Queen bees are sometimes sent on journeys through the post, even being despatched abraid. It is a long and hard trial to be packed away in crowded mail sacks in the recesses of a steam's hold. To overcome this disadvantage the Italian cyporter provides a special car in which her majesty the queen may ride. She and her associates, and the little bit of candy that goes with them, are very light, yet the exporter makes a large, cumbersome cage in which she is to ride. The reasons for this are two. First, the soft may be a special through the post of the company of the confect of the company of t

The term reverend was first applied to a clergyman in 1657.

Not a Task to be Envied.

Not always enviable was the lot of the old-time juryman. For there was always the prospect of trouble if the verdict did not gratify the higher pow-ers. Thus the failure of a jury to con-vict Sir Nicholas Throckmorton made Oueen Mary "ill for three days" and Queen Mary "ill for three days," and she came out of her sick chamber to fine the disobliging jury (meanwhile confined in prison) the sum of \$10,000 a head, Elizabeth followed the same plan, and the practice of fining English juries did not cease until 1670, when a fine inflicted by the notorious Jef-

treys was rescinded on appeal.

In some old-time "courts of quarter sessions" the injunction to lay their heads together had to be carried out by jurymen in literal fashion. When they began to consider the verdict they were supposed to dive beneath the level of the jury box and remain in that cramped position until a decision was

Meanwhile the court usher stood nea the box armed with a long wand or wil low. If any juryman ventured to emerge above the surface before the twelve minds were agreed, down came the wand on the head of the offender.

Aeroplane Shaped Like Bird.

An artificial bird, built by a French nventor, which has recently been subjected to practical tests, apparently solves what has been one of the hardest problems in connection with heavier than air flying machines that of inherent stability. This device is a small model of an aeroplane, with body and wings shaped exactly like those of a bird, and, from reports of the tests, it represents the biggest step forward since the Wright brothers first invented the aeroplane. This model is the result of years of investigation of the mechanics of bird flight, and, in particular, of the shape of the body and wings of soaring birds, the object being to develop a type of aeroplane that would automatically right itself and maintain its balance in right itself and maintain its balance in varying wind currents without the use of stabilizing devices of any kind and without the necessity of anw attention from the airman. If the full-sized machines work out as successfully rs this model, it means that one of the greatest describe in criticis has been writingly. dangers in aviation has been practically eliminated. With an aeroplane of this type the airman would be free to devote all his attention to steering and running his iachine, as there would be no neces-sity for warping the wings or changing the position of the ailerons to maintain the balance, as at present.—Popular Mechanics Magaine.
