Can You Afford To Speculate?

C VERY time you buy something you are either L speculating or making a definite investment.

Few people can afford to speculate. Yet many do it continually, in making their every-day purchases. And it is so unnecessary! The advertisements make it easy for anyone to avoid taking a chance.

The merchant or manufacturer who advertises, realizes that the goodwill of his customers mean money in the bank to him. He knows that public confidence in his product and public respect for his own character are as valuable as his credit at the bank.

So he makes the individual satisfaction of his patrons, their loyalty and their friendship paramount issues in his business.

When you buy an advertised product, you can know in advance what to expect in return for your money. You can count on its being right. You are making an investment.

But when you buy nameless, unbranded merchandise you are taking a chance. You are speculating.

KNOW WHAT YOU BUY. THE ADVERTISEMENTS WILL TELL YOU.
