 Press Despatch.

New York, April 29.-The stock market was heavy practically all day, and while a number of material recessions appeared, the general railway list suffered but fractionally. Stocks affected by the bill taxing corporation franchises in this state suffered the most. Metropolitan lost over five points, Brooklyn Transit nearly 4, Consolidated Gas as much, Manhattan a point, but Third Avenue was an exception, rising two points on small deadings on expectation that it would bid for the underground franchise. The traders were early sellers in expectation of a bad bank statement, but when it appeared, showing small changes, the reserve increasing one and one third million dollars, and loans decreasing about half a million, they covered. The traders covered, but the absence of commission business and the absence of local stocks, caused the market to ease off again, closing weak. London was a purchaser of a moderate amount of stock. Among the strong spots were Canadian Pacific and Colerado Fuel, which advanced 4% and 3 respectively. Practi-Consolidated Gas as much, Manhattan was a purchaser of a moderate amount of stock. Among the strong spots were Canadian Pacific and Colorado Fuel, which advanced 4% and 3 respectively. Practically all the industrials were weak.

There has been a further decrease in loans, the loss of \$585.300 being much less, however, than reported for the week ending April 22. Deposits have fallen off \$804.300 and as cash in creased over \$1.000.000, the surplus expanded \$1.348.775. Known operations for the week with the subcreasery resulted in a loss of more than three and a half millions to the banks, and this more than offset the estimated gain from the interior. An air of business activity pervaded very corner of the Square to-day, and sales were quickly made in the large majority of cases. The offerings and attend ance were the best of the week, the staple products being largely supplied. Farmers generally seem to agree regarding the condition of the fall wheat. From enquiries made of residents in different portions of the surrounding country various opinions were expressed. Only one, however took a gloomy view of the outlook for the crop, emarking that from present appearance it would be a "complete failure." Others, again, while acknowledging that the crop has suffered severely, state that the pros pects are fair for a good harvest. Many others are still more sanguine, and con tend that although the fields look bad that the roots are all right and that the crop, should the coming season be favor able, will be an abundant one. In many cases the wheat is beginning to feel the effects of the heavy dews and the springlike weather, and fields are becoming green. Altogether the prospects are not so disheartening as they were a few weeks
