

ARE AMERICAN INVESTMENTS SAFE?

Some of the wisest financiers believe the Free Silver Party will reduce the value of securities there.

Editor World: Will you kindly allow me, through the columns of your paper, to draw the attention of investors in "American Securities" to some important and surprising statements recently made by leading citizens of the United States, which may otherwise be overlooked.

In an American magazine, The Forum, of May, 1892, Mr. M. H. Horner (a member of Congress), in an article entitled "Free Coinage the Blight of Our Commerce," at page 281, says:

More attention is given now than was given a few weeks ago to the effects of the free coinage of silver upon the market for the people. The paradox that free coinage will decrease the supply of money, and at the same time increase its value, is becoming generally understood by those who are interested in the subject.

At the present time the floor of the House of Representatives is occupied with a bill stipulating the monthly purchase of ten million ounces of silver by the Treasury under the supervision of the Secretary of the Treasury.

By the natural inferiority of silver for money uses, its constant relative depreciation during centuries, accelerated by recent enormous production, the probability of further vast production, the probability of further vast production, the probability of further vast production...

How long will it require under present methods to secure the volume and force of silver adequate to displace gold?

The superstructure of circulation has grossly outgrown its base. To secure redemption and maintenance of the gold value of our currency...

And in an article on the Behring Sea controversy, General Benjamin F. Butler (Presidential candidate in 1884 and late Governor of the State of Massachusetts) writes, page 596:

Let us see what England's condition as regards war with us. England has given this war the peace and is of good behavior.

War permits the confiscation of all property of an individual found on the shores or within the jurisdiction of the other.

Every rod of our land, owned by English syndicates or subjects would be lost to her. It would seem as if we could find the means to carry on the war by selling her property in war market and using the proceeds, and when we hear the shells from her fleet, if we should do so, breaking the plate glass in Broadway, we should be comfortably remembering that a great deal of it belongs to English people.

In view of the fact that a Free Coinage Bill has within the last few days passed the United States Senate it will be surprising if British and Continental capitalists, after duly considering the facts above referred to, still continue to invest in the United States as in the past, overlooking many better opportunities offered in Canada and other portions of the British Empire, where at any rate there is no possible danger of such depreciation, much less confiscation.
