The DREXEL LIGHT.

6 feet of gas per hour in an ordinary burner will produce from 18 to 20 candle power of light.

3 feet of gas per hour with a Drexel Light will give 60 to 70 candle power of light.

THEREFORE:

1 Drexel Light gives more light than 3 ordinary burners at one-half the cost of gas or

6 times as much light at the same cost as 1 ordinary burner.

At Montreal the Drexel Light costs only 12 cents per week to run, or less than a coal oil lamp.

Duration of Drexel Mantle: 900 to 1,000 hours.

The Drexel Light produces no ghastly greenish hue, but an absolutely pure white and steady light.

We keep on hand a selection of pretty GLOBES and SHADES which we sell to purchasers of our light at cost.
