
[187.] 252. *LEPTURA LONGICEPS* Kirby.—Length of body 4 lines. Several specimens taken in Lat. 54° and 65° .

Like the preceding species but shorter in proportion with a longer head. Body black, punctured, hoary with rather silvery down: head as long or longer than the prothorax; eyes pale, subtriangular; antennae with the second, third and fourth joints slenderer than the rest: prothorax shaped as in *L. Proticus*, constricted before, depressed behind, but without diverging angles, channelled but with no gibbosity on each side the channel: elytra nearly linear, very thickly punctured, dirty-yellow, with a dusky lateral blotch extending from the base beyond the middle of the elytrum, suture and subtruncated apex black; down yellowish. [Belongs to *Acmaeops* Lec.]

END OF CERAMBYCIDÆ.

OBITUARY.

We grieve to have to record the death of another devoted Entomologist, MR. COLEMAN T. ROBINSON, of New York, who expired, after a very brief illness, on the 1st of May 1st. Mr. Robinson was born in Putnam County, N. Y., in 1838, and had but recently completed the 35th year of his age. When quite a young man, he made a prolonged tour through Europe, Egypt and the Holy Land, and spent some time at the University of Berlin. On his return to New York, in 1861, he engaged in business as a stock broker in Wall Street, and soon became the head of a very successful and enterprising firm, Messrs. Robinson, Cox & Co. So shrewd and successful were his speculations that in a few years he amassed a large fortune, and on his retirement from business a couple of years ago, he was reputed to be worth about a million and a half of dollars. Latterly he resided near Brewster's Station, on the New York and Harlem Railway, where he had purchased a handsome country seat. Notwithstanding his devotion to business of so engrossing and exciting a character, he yet found time to indulge in his favorite study of Entomology, and in connection with his friend, Mr. Grote, described a large number of new species of North American Lepidoptera, chiefly belonging to the families of Sphingidæ, Bombycidæ, Noctuidæ and Tortricidæ. A list of his published papers, prepared by his coadjutor, Mr. Grote, is given on another page. We are glad to learn that amongst his other bequests, Mr. Robinson left the handsome sum of \$10,000 to the Buffalo Society of Natural Sciences, with which he was connected for several years.
