To be Dyspeptic is to be miserable. Dyspepsia is a disease in which a thousand ills seem to be combined, yet in very many instances may be traced to nothing more than an improper assimilation of the food. To remedy this is to cure the disease. By the use of Hanington's Quinine Wine and Iron, and Tonic Dinner Pills, the organs of Digestion are strengthened, the food is assimilated readily, and the disease is eradicated. Many who have suffered the indescribable tortures of Dyspepsia for years owe the restoration of their health and strength to the use of these medicines. Beware of imitations. See that you get "Hanington's" the original and genuine. For sale by all druggists and general dealers in Canada.

CHRONIC BRONCHITIS.

When Bronchitis take the chronic form the attending symptoms become greatly aggravated, and are associated with many of the very worst symptoms of Phthisis, viz., excessive cough, free expectoration, rapid pulse, night sweats, etc., and finally great debility and emaciation. In this stage the diagnosis between this and Tubercular Consumption is sometimes very difficult; and it is in this case that Cod Liver Oil, when the sufferers can retain it, is of special advantage; and PUTTNER'S EMULSION OF COD LIVER OIL can always be easily retained. In such a case it is invaluable. Under its use we find the cough cease, expectoration diminish, the pulse regain its regularity and force, night sweats cease, physical strength return, and the emaciation give place to renewed flesh. As this state of things may be a sequence of a cold which has been neglected, it behooves every one to be particularly careful of himself while laboring under a cold, no matter how slight it may apparently be. The main thing is to check the disease at its very inception, and the best means by which to attain this is by the early use of PUTTNER'S EMULSION.
