DO MICROBES CAUSE DISEASE?

The Microscopical Science as practiced by all the leading scientific members, investigating on behalf of the Medical Profession, are unanimous upon this one great truth, and have proven beyond peradventure that to radically cure disease we must destroy the **Disease Germs**.

But they Differ Widely as to the Method

Of Doing This. In the meantime **Radam's Microbe Killer** is quietly performing its noble functions of proving itself the greatest blessing ever bestowed upon disease afflicted humanity.

HOW DOES THIS REMEDY CURE WHERE OTHERS FAIL?

By destroying the real cause of disease, **Microbes**, which have fastened their death-dealing hold upon the sufferers by invading the blood and tissues of the entire human system.

IT DESTROYS THESE WITHOUT HARM TO THE PATIENT

At the same time acting as a **Tonic** in restoring the full digestive powers of the stomach, **through which organ only**, that enters into the human system, which is necessary to produce new blood and new tissue to take the place of the diseased portions, and good substantial food, **not drugs**, fully digested and assimilated only does this. **Pay no attention** to anyone who claims to effect cures by **patching up** diseased cells or decayed tissues; it cannot be done. Your own common sense will tell you that what is rotten or decayed cannot be made whole again. No medicines upon earth will do this. We possess **thousands of testimonials** from all parts of the **world**. Our headquarters are not in an obscure portion of the United States. Write us for a full descriptive treatise and learn for yourself the truth of our assertions.

All who do not seek a miraeulous cure in two weeks' time, for Fifty Cents, are invited

To consult us in person or by writing and obtain full particulars as to what Microbe Killer can do for them in a rational way, based upon strict, simple, physiological truths, not bordering upon lunacy.
