It has been said that the policy of the provincial government was prompted by the alleged detective character of our schools. As a matter of fact, those gentlemen did not know the exact condition of our schools; they had never taken the trouble of investigating their condition. Never a hint had come to us from those quarters that any improvement in our teaching, or in the management of our schools, was desired. On the contrary, again and again we had been praised for our work in the important matter of the education of youth, by every one, high and low, who had come in contact with our institutions, and those praises were merited; because notwithstanding what has been said, our schools were in as good a condition as their rivals, the Protestant schools. That fact I established in this House in 1895. And yet, the government of Manitoba, adding insult to injury, swept away our schools in such a manner that the Hon. Hugh J. Macdonald had to describe the action of that government as a brutal one. They had no regard for our feelings, no regard for our rights, no regard for the parliamentary compact entered into by the province with this Dominion. More than that, they had no regard for their own pledges. Because it must be remembered the party whose leader Mr. Greenway was, the gov-

BUYING **DRUGS**

Is entirely a matter of confidence, as in no other business is sophistication easier; nor does any other avenue afford so ready a means of disposing of worthless articles. You can buy a pair of shoes for \$1 or \$10-it's entirely a matter of quality. There is as much difference in the quality of drugs as there is in shoes, except in purchasing one you can use your own judgment, in buying the other you are entirely dependent upon the honesty and judgment of the Druggist.

In one case it is only a matter of comfort and appearance, and in the other frequently of LIFE or DEATH.

You can always rely with the utmost confidence on the DRUGS and Medicines which you get at
