

*Made in Canada*

*Sherbrooke-Derby Line Highway, (Provincial Government)  
Near Lenoxville, Quebec. 7 miles of Tarvia Filled  
Macadam—Penetration Method*

## *The use of Tarvia means Better Roads and Lower Taxes—*

**T**WENTY-FIVE years ago, smooth and well-kept roads were the special pride of Old England, where they were the product of two centuries of incessant road improvement.

But those fine roads were only macadam, and they were not fitted for the gruelling of automobiles.

Now, with the automobile everywhere, you find in every section of Canada examples of better roads than Old England's best roads of twenty-five ago.

Tarvia has been an important factor in this development.

Good roads now don't require generations of labor nor immense outlays from the taxpayers.

The use of Tarvia on an ordinary macadam road will make it the pride of a community; it will give luxurious com-

fort to all the citizens; it will be a delight to visitors;—and most important perhaps, it will result in reduced taxes. Tarvia makes a smooth, resilient and dustless surface. It gives to the automobile a glide that makes a mile seem like a quarter. It gives to carriage riding a welcome comfort and to teaming an easier pull. It abolishes the curse of dust and the messiness of mud.

A Tarvia road brings the farm and the town closer together. It is an asset to the community.

Tarvia roads often last years without any renewal. But even renewals of Tarvia are the lowest cost road improvement that has been invented.

The reduction in maintenance expense, for a Tarvia road, in most cases more than covers the total cost of treatment.
