

The Canadian Department of Human Resources - Labour Market Services - has contact with Mexico primarily through the supervision of the Mexican Seasonal Agricultural Workers Programme; an annual policy and programme review meeting is held in this connection (most recently in Ottawa in January 1996).

Industry Canada, through its Science and Technology mandate, cooperates with the Mexico's S & T Counsellor at the Mexican Embassy in Ottawa, and with the Mexican Council of Science and Technology (CONACYT). In March 1994, the Directorate organised with Mexico a **Plant Biotechnology** workshop.
