

Hundred Bar

10 horse-power up to 100 horse-power

REFERENCES FOR PLANTER TOOTH SAWs.—Firthbrook & Son, Steubenville, Ohio; Wesley Station, Fife, Ont.; W. and S. B. Angus, Kingweston, Ont.; R. A. Wood, Guelph, Ont.; Charles Anderson, Cambridge, Ont.; J. E. King, Kitchener, Ont.; T. and R. Green, South Galt, Ont.; C. C. and J. C. Ward, Waterloo, Ont.; and R. C. Smith, Waterloo, Ont. Saw should cut 600 feet of Timber. When saw comes to a dull edge or pointed it always remains sharp: requires no sharpening whatever you run it; when teeth get dull they can be sharpened from one to ten times.

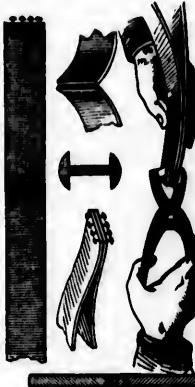

We are making six sizes of above Pumps, from one to five.

Having perfected machinery by which the gearing and water-pump are cut out of solid iron casting, we can guarantee all sizes to be perfectly made. We also use the best charcoal iron for castings, and steel for shafts, thus insuring durability.

Waterous & Co.
Neptune Mills Paper Manufacturing Company, H. M. WRIGHT, President, Niagara (have four of our

pumps in use).
