| Brooman's patent, . . . . .                    | 140                |
| Bodman's patent, . . . . .                     | 141                |
| Bancroft's patent, . . . . .                   | 143                |
| Buildings, . . . . .                           | 148, 149, 162, 163 |
| Bicarburetted hydrogen, . . . . .              | 123                |
| Benzole, . . . . .                             | 102                |
| nitro, . . . . .                               | 103                |
| Brick ovens, . . . . .                         | 64                 |
| Campbell, James, . . . . .                     | 168                |
| Cements, . . . . .                             | 172                |
| Coal, varieties of, . . . . .                  | 44                 |
| Composition of, . . . . .                      | 44, 45             |
| Effects of heat upon, . . . . .                | 12, 13             |
| Boghead, . . . . .                             | 47                 |
| Albert, . . . . .                              | 49                 |
| Breckenridge, . . . . .                        | 50                 |
| Australian, . . . . .                          | 57                 |
| Table of products of, . . . . .                | 56                 |
| Products of the distillation of, . . . . .     | 93                 |
| Coal distilled for gas and for oils, . . . . . | 110                |
| Coal tar, . . . . .                            | 94, 95             |
| volatile bases in, . . . . .                   | 94                 |
| Candle tar, . . . . .                          | 51                 |
| Caoutchouc, . . . . .                          | 115                |
| Cedret, . . . . .                              | 92                 |
| Carburetted hydrogen, . . . . .                | 123                |
| Chlorohydride of ammonia, . . . . .            | 169                |
| Caustic alkali solution, . . . . .             | 158                |
| recovery of, . . . . .                         | 168                |
| Carbolic acid, . . . . .                       | 100                |
| Canada, petroleum of, . . . . .                | 40                 |
| Choke damp, . . . . .                          | 123                |
| Coke ovens, . . . . .                          | 68, 69             |
| Crude coal oils, treatment of, . . . . .       | 152                |
| Condensers, . . . . .                          | 71, 72             |
| Continual distillation, . . . . .              | 153                |
| Copnomor, . . . . .                            | 90                 |
| Coke, . . . . .                                | 168                |
| Cumole, . . . . .                              | 98                 |
| Derrick, . . . . .                             | 27                 |
| Dundonald, Earl of, . . . . .                  | 8                  |
| Densities of petroleum, . . . . .              | 114                |
| Dumoulin and Cotelle's method, . . . . .       | 143                |
