

# Increase Your Cut

BY USING IN YOUR MILL A

# Gaskin Pat. Saw Bench and Jointer.

PATENTED IN UNITED STATES AND CANADA, 1888.

**THIS MACHINE** saves 25 per cent. of your saws; increases your cut, and effects a saving in the wear of your machinery. It enables your saws to turn out smoother and more even Lumber than when hand filed.

*IF YOU CARE TO KNOW HOW IT WILL DO WHAT IS CLAIMED FOR THIS MACHINE, SEND TO US FOR A FULL EXPLANATORY CIRCULAR.*

THE FOLLOWING TESTIMONIALS SPEAK FOR THEMSELVES:

Robert Gaskin, Jr.

DEAR SIR,—Having given your "Gang Saw Jointer" a fair trial, I am now satisfied that it will do all you claim for it. It has certainly increased the quantity sawn by my gang per day from five to six thousand and will increase it still further when the fiber is more accustomed to the machine. The machine is very simple in construction, and the principle so easily understood that no mill owner need hesitate about putting it in his mill.

MARBLE COVE, PORTLAND, N. B., 18th Aug., 1888.  
Yours, truly,  
W. H. MURRAY.

To Whom it may Concern—This may certify that we have used one of Gaskin's Saw Jointers in our mills for some months past and find it of great advantage in the preparation of our Gang Saws for doing good work. The principle of straining the saw as it is in the gate, while under preparation, we deem an important and correct one, and most cheerfully recommend "The Gaskin Saw Jointer" to mill owners.

Robert Gaskin, Esq.

DEAR SIR,—The Saw Jointer you placed in our mill has exceeded our expectations. We can confidently recommend it as doing all you claim for. As the saws are keyed to the same tension in the jointer as in the saw gate it makes them perfect, both as to straight face and uniform overhang.

UNION POINT MILL, FAIRVILLE, St. John Co., April 15th, 1888.  
Respectfully, yours,  
WM. L. WARING, Supt.
