## **GOVERNMENT REPORT**

Continued From Page 11.

Conditions would seem to show that unless prices decline the export demand will be light this summer. We do not see very much in corn at present, but believe that prices will be lower before July 1. It is, however, a long time before a new crop will be secured and many chances for crop scares in July and August. Consequently we assume that it is good judgment to bus a fair decline.

Outs—Market ruled steady, showing no

onts—Market roled steady, showing no effect from the weakness in wheat. There was good buying by commission houses of September and December oats. Local traders sold. The July option trade only moderate. Receipts light and local stocks continue to decrease. The government is expected to show a possible crop of considerably over 900,006,000 bushels.

Frovisions—There was an active demand from a scattered short interest. Prices advanced sharply. Hogs were 5c higher. Receipts at western points, 54,000, against 77,000 the same day last year. The gossip is that Armour controls the stock of ribs in this market.

Ennis & Stoppani wired J. L. Mitchell, 21 Melinda-street:

Wheat—Liverpool was comparatively steady this morning and weather conditions in the southwest were sufficiently wet to cause covering by shorts, but not sufficient to cause any new buying power. The recent heavy rains seem to have done very little damage and to-day's government report is expected to show from 2 to 5 points improvement in winter wheat.

First came the old fashioned liquid polish, that blacked shoes without shining them. The bottle-and-box combination was improvement, but meant too much hard work. "2 In 1" is the perfection of shoe polishes. It's

a Paste that embraces the good points of all other polishes, with none of their faults. One application-one rubbing-and the shoes are shined. It's made of pure oils, that preserve the leather. Contains no acids or turpentine.

IN 100 AND 250 BOXES, AND 150 TUBES. AT ALL DEALERS.

Shakespearean commentators have

often wondered why the poet placed he scene of "Hamlet" at Elsinore, in the Island of Zealand, whereas the Danish prince lived and died in Jutland. But just recently the municipal authorities at Elsinore, or Helsingor authorities at Elsinore, or Helsingor, have discovered in their archives that an English company was acting in their town in 1587 or 1588, and among the names of the actors are several of those who were acting with Shakespeare in London in 1589. Obviously these actors must have talked about their adventures in Denmark, and so Shakespeare became well acquainted with Elsinore, and, when he wrote "Hamlet," naturally placed the scene "Hamlet," naturally placed the scene in a place which he knew by description rather than in an island of which he knew pothing. The poet was no great stickler for accuracy in geographical matters, and this visit of the English actors plausibly explains the reason why the tragedy of "Hamlet" reason why the tragedy of "Hamlet" was placed in Zealand and not in Jut-
