W. T. WHITE, General Manager. The President, in moving the adoption of the report, said:

The Report of your Directors exhibits so clearly the results of the last year's business and the financial position of the Company that it will not be necessary for me in moving its adoption to more than indicate its leading features.

The earnings, amounting to the net sum of \$92,020.90, show an increase of \$3,260.96 over the record of the previous year and represent over 9½ per cent, upon the Company's capital stock. In this connection it may be interesting to note for the purposes of comparison the net earnings for the past four years, during which period the shares of the Company have been fully paid. The figures are as follows:

\$78.097.01

funds or such trust or agency funds as we are specially authorized to invest this way.

I beg to move, seconded by Mr. Z. A. Lash, the adoption of the report.

Of Course Low Prices Are Responsible For the Great Quantity of Furs That We're Selling

More people are posted on the state of the fur markets than we thought possible. Indeed, it would appear as though furs were a proper subject for widespread knowledge of the rapid rise in values, with the possibility of certain furs doubling in value within the coming year. As far as our fur stock is concerned, we're not being influenced by the increased prices for raw skins We set about clearing up the stock on the basis of what the furs cost us, not what they're worth now. This policy we shall pursue until we have closed the department for the season.
