SENDING OF LIND TO MEXICO DEEMED AN AUDACIOUS STROKE

Diplomatic Circles Analyze President Wilson's Action-Ambassador Wanted States to Claim Full Compensation For American Losses Running Into Millions From Present Struggle.

(Special to The Sunday World).
WASHINGTON, Aug. 9.—A prominent diplomat, who, for obvious reastimulate and create a formidable and effective opposition to the Mexican usurper at the very centre of his power? When Felix Diaz assailed Madero at the distance of Vera Cruz Diaz fell; when Diaz assailed Madero in the heart of Mexico City Madero fell. Is President Wilson attempting a like audacious stroke? If it succeeds it will be brilliant beyond compare. It will be final proof that there is genius in the president's brain If it fails spectacular and momentous is like to be the failure thereof. sons does not wish to be quoted, was asked his opinion of the Lind missich to Mexico. His reply was as

"None but President Wilson can say—and he has not said—precisely what idea has created his hope that Mr. Lind may be able to bring about peace in Mexico. The logic of the situaton, however, points to a very

"While there has been no official statement of the full scope of the former governor's mission, enough has been authoritatively said to make it clear that a primary object with which he is charged is to secure General Huerta's elimination from

"Does President Wilson believe that Huerta is a disinterested lover of his country who will gladly efface himself the moment he is convinced that his retirement is essential to the restoration of harmony and peace? Does President Wilson believe that Huerta is a man of mind so open, so broad, so free from egotistic bias, so ideally judicial, so sensitively amenable to reason that he only needs to receive a cogent statement of conclusive proof to perceive and acknowledge immediately that he is a fatal stumbling block to the pacification of Mexico and that his path of duty is to rendunce the eminence he has attained, to forego the supremacy to which he aspires and to retreat to the shades of obscurity and probably of exile?" If President Wilson believed these things of Huerta he would necessarily hold so high an opinion of Huerta that he could have no excuse for refusing to recognize Huerta's government.

An Audacious Stroke.

"If then President Wilson does not expect Mr. Lind to find a Huerta who will readily become the thrall of logic and patinties how described in the state department claims for scores of millions of dollars would be without hope of compensation for the losses they have sustained. The American ambassador was so surprised by this announcement by Secretary Bryan that he asked for his own protection, to have his instructions repeated before he would take the responsibility of communicating the policy adopted by his government. This is held to be a complete reversal of the attitude assumed by the United States a dozen years ago when Secretary Hay demanded and procured full compensation from China for damages suffered by American citizens in the unsuccessful Boxer rebellion. himself the moment he is convinced that his retirement is essential to

"If then President Wilson does not expect Mr. Lind to find a Huerta who will readily—become the thrall of logic and patriotism, how does he expect that Mr. Lind may accomplish the general's elimination? What other idea and hope can President Wilson have than that Mr. Lind's presence in Mexican executive's ultimatum of non-recognition of the Huerta regime may

MOTOR BOAT RACES AT CENTENNIAL

Big Prizes at Hamilton Next Week.

The motor hoat races, to be held at Hamilton during the centennial celebration, should prove of considerable interest. Among other races there is a five mile hardicap open to boats with one and two cylinder engines. This will enable a great many of the smaller boats to enter, and as the handicap is to be by actual performance, the race should be won by the boat having the most reliable engine and most expert

The bang-and-go-back race will also give low powered boats the same running thirty-five miles per hour. In this race all boats start with the gungoing straight down the course towards. Dynes. Upon a given signal all boats will turn and come back, finishing at the starting line. Of course in this race a boat making thirty miles an hour would have traveled three times as far as a boat making ten miles an hour and consequently the fast boat would have three times as far to travel in returning. Theoretically all boats should finish at exactly the same instant. There will be an inspector in each boat to see that the speed of the engine is not altered during the race. The fifteen mile race, open to displacement boats, should bring out some fast launchies.

The twenty-five mile free-for-all race for the Great Lakes Power Boat League championship carries with it the Penton solid gold trophy, which cost over \$1000, and this should be one of the most inveresting races of the regatta. It is over a triangular course, five miles around. The boats will therefore make five laps, and as it is open to hydropianes as well as displacement boats, most of them will make twenty-five to thirty-five miles per hour. In addition to the gold trophy there will be three handsome cups.

The last race of the week will be the this race all boats start with the gun.

BALMY BEACH HOLDS ANNUAL REGATT

Last End of Gala Event

The annual fall regatta of the Balmy Beach Canoe Club was held Saturday afternoon, in front of the clubhouse, and all the events were very keenly contested. The intense rivalry which existed between the club paddlers brought forth nearly every active member and the Edmond brothers were forced to the limit to beat their clubmates. All the boys were anxious to display their prowess against the latter pair, as they have just returned from the C. C. A. finals where they made a good showing. Some novelty events tended to make the card a humorous as well as thrilling feature, and the war canoe race between the "Has Beens" and the "Yet to Bes" attracted a lot of attention. This was the last regatta of the year and the points for the year will be totaled for the season, including these events, and the champions for 1912 declared. The J. J. Dolan cup and the Muirhead shield will become the property of the champions.

Tried Recipes

Fried Eggs with Tomatoes.

Put a cup of fine oil or lard into a little frying pan. Heat it lightly and then incline it slightly in order to bring all the oil to one side. Break a fresh egg even with the liquid and with a little skimmer roil it up to an oval form. Cook it until the outside part in well set, keeping the yolk liquid exactly as in the case of a poached egg. Cook thus all the fresh eggs one after another. Serve them in a slightly deep dish, turning over them a sauce of fresh tomatoes. Garnish with fried croutons,—Cleveland Plain-Dealer.

Potato Nest with Peas.

MARCH AT FUNERAL

Inish with fried croutons,—Cleveland Plain-Dealer,

Potato Nest with Peas.

Six potatoes boiled, two eggs, one pint of peas, carrots, chopped; one half cup parsley to garnish. Mash and cream six boiled potatoes, being careful not to add too much cream. Line well greased muffin pans with the potato, leaving a nest in the centre. Brush with beaten eggs and bake until brown. Remove carefully to a platter, and fill the centre with creamed pears and carrots. Garnish with parsley and send at once to the table. This is very nice accompaniment to lamb chops.

Clams on Toast.

Take clams and steam them very frankfyille Frankf

Chicken Hollandaise.

Cooked chicken, one pint; chopped celery, one half cup; butter, two tablespoonfuls; onion juice, one teaspoonful; chopped parsley, one tablespoonful; yolks of eggs, two; juice of one half lemon, paprika, one tablespoonful catchup; one cup of stock or water. Melt the butter in the chafing dish. Add the celery and cool or water. Melt the butter in the chafing dish. Add the celery and cool just a few moments. Add all the remaining seasonings with the carefully cooked meat of the chicken cut in small pieces. Stir all well together, and when well heated add the yolks of the eggs well beaten. Serve with water cress sandwiches made with thinly sliced bread, buttered.—Chicago Inter-Ocean.

The Motorcycle and the Bicycle. Statistics show the remarkable increase in the use of the motorcycle and the decline of the use of the bicycle. In Canada and the United States the number of bicycles made decreased from 1,182,691, valued at \$28,656,487, in 1899 to 250,487, with a value of \$3,740,923, in 1904, and 233,707, valued at \$3,228,189, in 1909, while the output of motorcycles increased from 160 valued at \$33,674, in 1899, to 2,328, valued at \$359,180, in 1904, and 18,628, with a value of \$3,015,988, in 1909. The evolution of the bicycle from primitive and unserviceable types to a useful and attractive means of travel means by the service and the service a able types to a useful and attractive means of travel may be said to have taken place between 1868 and 1890, and its perfection and standardization

Mattawa.

demand for motorcycles. The average number of persons engaged in the bicycle and motorcycle industry in 1909 was 5,017, of whom 4,437, or 88.4 per cent. were wage earners.
As already stated, the industry was

LABOR TROUBLES

Oct. 14 and 15 Sept. 23 and 24 Everything Is Likely to Run Smoothly Until Next Spring.

MAKING UP LOST TIME

Sept. 23 and 24 Only Two Small Strikes Are Now on and These Expected to End Shortly.

Toronto seems to be about clear of

tweenu employers and employes terminate.

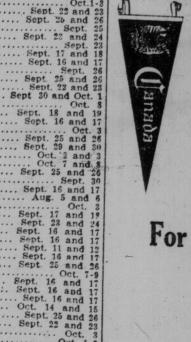

The carpenters' strike was the most serious of the season, and for a while it looked as if the building operations in the city would be curtailed to an alarming extent. However, all the men whose employers did not sign outright to grant the increase in wages, have been placed, and an effort to catch up the lost time created such a demand for carpenters, that a shortage of these machanics was feared. The outstanding feature of the strikes this year among the mechanics employed in the building trades, was the influence of the Building Trades League, which was formed about six months ago. The procedure of members of other unions than the one striking to refuse to work alongside non-union men was quickly felt and if the strikes had not been terminated quickly, no doubt more serious results would have been the outcome. The only unions who still have strikes on their hands, are the engravers and the structural from workers, but it is expected that satisfactory agreements will be reached in the near future in both these cases.

Crepe paper towels offer one means of lessening the work of the laundress in the summer, or, if the laundry is done out of the house, of lessening the size of the laundry bill. The towels, of substantial thickness, are sold in packages of 100 for 50 cents. Granted that they can be used only a few times—sometimes only once—sure'y five of them would last as long as a freshly-laundered huckaback towel; and the price charged in most laundries for washing and ironing a huckaback towel is 2 1-2 cents, the price of five paper towels. Moreover the wear and tear which the hackaback towels would otherwise have is saved.

Nickel holders can be had for holding the towels for 50 cents, but the towels can be easily managed without the holders, as they can be bought neatly folded.
