

# UNIVERSITY OF MANITOBA.

EXAMINATIONS, MAY, 1894.

MENTAL AND MORAL SCIENCE (LAW).

REID.

1. Point out the nature and use of analogical reasoning and the danger attending its employment in Mental Science.
2. (a) Distinguish sensation and perception, (b) what according to Reid is involved in the act of perception?
3. Give an account of the notion of "cause" and point out its importance in the development of philosophical enquiry.
4. Explain fully the distinction between primary and secondary qualities of body as held by Reid.
5. State Reid's view of personal identity and of its relation to memory.
6. "The notion that in perception the object must be contiguous to the perceiving mind seems with many other prejudices to be borrowed from analogy" (Reid). Examine this statement.
7. (a) Give a brief account of the formation of general terms.  
(b) Distinguish nominalism, realism and conceptualism.
8. (a) Explain fully what is meant by "principles of common sense," and point out their philosophical significance.  
(b) State their characteristics as laid down by Reid.
