WAS TROUBLED WITH BOILS AND CARBUNCLES. There is no more frequent source of illness than that arising from bad blood, for when the blood becomes impure, it is only natural that boils, pimples or some other indication of bad blood should break out of the system.

Boils in themselves are not a dangerous trouble, but still at the same time are very painful, and the only way to get rid of them is to cleanse the blood of the impurities. Cleanse it thoroughly by the use of Burdock Blood Bitters, that old and reliable blood medicine that has been on the market for nearly forty years.

Mr. James Wilds, Plaster Rock, N.B., writes:—"I was greatly troubled, a few years ago, with boils and carbuncles, and the doctor told me I was in a bad condition. My appetite failed me, I began to lose strength, and was pretty well run down when one of my friends recommended Burdock Blood Bitters. After using three bottles I began to feel like another man. My troubles soon left me, and to-day I can certainly give Burdock Blood Bitters a high recommendation to my friends."

NOVELTY IN CORPORATE MANAGEMENT Wider Scope of Modern Life Insurance—Superintendent Emmet Warmly Commends Metropolitan Company

The report of the New York State Department of Insurance on the triennial examination of the Metropolitan Life Insurance Company has just been published by the state. Under the law, revised by Governor Hughes, this examination must be made every three years. About twenty examiners of the insurance Department devoted nearly a year to the work, and Mr. Emmet, as superintendent of the department, wrote an extended report of the report. In this report, Commissioner Emmet not only made an analysis of the company's condition as a business corporation, but of its activities along the broader lines of social service among industrial workers, health education and the conservation of human life. He points out that the company, now having more than thirteen million policies outstanding, has assumed such proportions that it is practically brought into immediate contact with approximately one-eighth of the population of the United States. Extracts from the report of Mr. Emmet appear in the advertisement of this strong company which appears on another page of this paper.
