

## LECTURES.—SESSION 1894-95.

### PRINCIPLES AND PRACTICE OF MEDICINE.

BY PROF. FRANCIS W. CAMPBELL.

ASSOCIATE PROFESSOR, J. BRADFORD McCONNELL.

It is proposed in these lectures to give a definition and history, with the etiology, symptoms, diagnosis, prognosis, complications, sequelæ, pathology, and treatment of the more important constitutional affections, as well as of the diseases which attack the principal organs of the human body. The distribution of the course will have, as far as possible, some reference to the different systems and organs, the diseases of which will be considered in separate groups.

The lectures will be illustrated by plates, diagrams, pathological specimens, microscopical preparations, &c.

A few lectures will be given on Medical History and Ethics.

Particular attention will be given to the special Pathology of the different diseases and their therapy.

*Books recommended.*—Flint, Osler, Strümpell, Roberts, Page, Fagge ; for reference, the American System of Medicine.

### NEUROLOGY.

PROF. J. BRADFORD McCONNELL.

The course of lectures on Diseases of the Nervous System will constitute a special department of the lectures in medicine. It will include, first, an outline of the various methods and tests employed in the diagnosis of these affections, the use of the ophthalmoscope, electricity, æsthesiometer, &c. ; then a general consideration of the chief Diseases of the Brain and Spinal Cord, and of their membranes and nerves. The application of electricity and hypnotism as therapeutic agents, &c.

*Books Recommended.*—Hirt's Diseases of the Nervous System, Gowers, Gray, Ranney.
