> int co god NAKUSP. Hugh McCutcheon, collector of cus toms at Nakusp, was in Rossland the past few days on a business trip. When seen by a Rossland Record representative he stated that Nakusp would incor-porate as a city on July I of this year, and that Thomas Abriel would be elected the first major of the new municipality by acclamation.

A syndicate formed in Toronto has Rangoon some months ago, where his bought up the two hot water mineral vessel was loading. He was a native springs back of town, and will put up a \$50,000 sanitorium, with all modern improvements and accommodations. The ocation has been selected directly back town on the flat at the foot of the mountain, and a driveway is now about completed to it. The company will also have an electric power and light plant of sufficient capacity to furnish the city with electric lights.

> KASLO. Ex-Mayor: McAnn is confined to he room by a severe attack of quinsy, D: Hogers is the physician in attendance. As soon as the ore awaiting shipment is cleaned up the steamer Arberta will take the International's Tun, and the latter vessel will be hauled out for overhauling and refitting, which will include the introduction of a few new staterooms.

The assessment roll of the city of Kaslo for the current year has been com-pleted and delivered to the city clerk. It shows a total of 840 separate assessments with owners located all the way from Kingston. Ontario, in the east, to Sctoria in the west. The assessed value of improvements is \$309,325, and of land \$330,240, making a total of \$639,565. Last year the assessed value of improve-ments was \$293,850, and of land \$325, 670, making a total of \$619.520. The increased assessment of improvements does not, however, really represent the quantity of building done during the past year, as the poles and equipment of the Kostenay Electric Company have been transferred to the realty column, and certain allowances have been made for depreciation.

LILLOOET.

Between 8 and 9 o'clock on Wednesday morning, the residence of Major Burnett, P.L.S. was discovered to be on fire. Flames had burst through the ceiling of the sitting room and were mak ing rapid headway... The fire was got under control, little damage being done The Brett Bros. came down from Mc Gillivray creek the fore part of the week, and will return in a few days to do some development work on other claims which they hold in that section. The tunnel on the Brett group has now been driven to the distance contracted for and the ore shute which is seen on the upper tunnel is now reached on the middle one. Mr. Skinner is expected up next week and will bring an expect with him and if the report is favorable a stamp mill will probably be erected at once. From all accounts the ice on Bridge river is breaking up. The route up the river on the ice is much better than by the trail and parties suggest that a pe-tition should be sent to the government B. McKechnie, W. A. Nettle, W. F. Lee asking them to devise some means of and T. J. Graham, for aldermen. The keeping the fee there all summer. Another suggestion is that a dam be built across the river and erect an electric plant there to supply the town with light. The water would then likely freeze up parte.-Lillooet Prospector.
