All those interested in poultry-keeping should attend the meeting called for Saturday night to discuss the organization of an Egg and Poultry Circle. The County Organization is completed but locals have yet to be organized in some centres. Plans are completed for the regular shipping of eggs, and it is planned to have members' flocks called in July or August of old hens that will be shipped by weight in a special poultry car. It is also expected that arrangements will be made whereby dressed poultry will be shipped. It is hoped that such an organization will have the effect of stabilizing the market by judicious control shipping. The consumer will be guaranteed a first class article and the producer will be assisted during the disastrous slump in prices that have recently occurred each Spring, because the regulation of shipments to various markets will prevent the glutting of one.
