

The Country is composed of Granite, presenting smoothed & rounded knolls and ridges, which latter trend N.W. & S.E. Dense but fine wood prevails wherever there is a sufficiency of soil - but there is not the same luxuriant vegetation that exists towards the Lakes Superior and Winnipeg.

Camp 28th June

Width of River abt 140 Yds.

Rapids to about 40 ft. or more

The shores of these Lakes seem to be everywhere steep & rocky and though not precipitous yet quickly reach a considerable elevation at most points.

Route

Route

Series of falls

Very large Lake. Shores high, rocky and finely wooded.
