

Canon *The Obvious Choice*

CANON PALMTRONIC LD-8M2

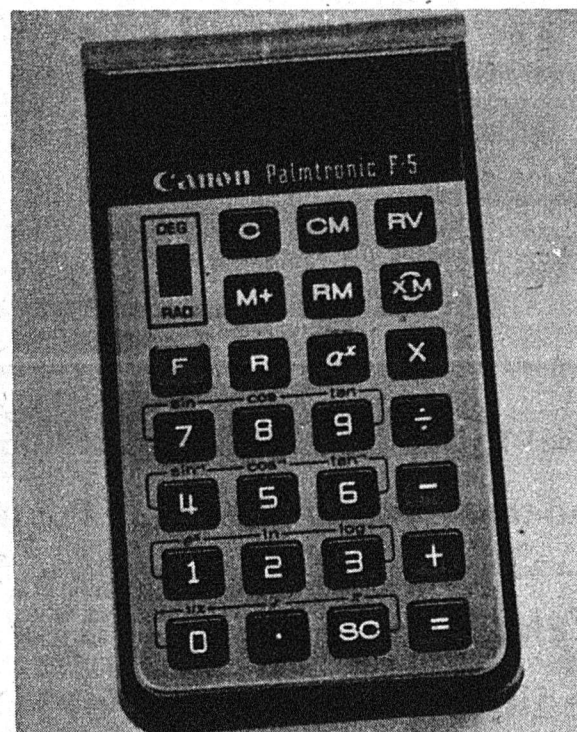

More Than Just a Small Calculator

The LD8M2 is small enough to fit in your shirt pocket, yet has a large, easy-to-read display. Calculation demands are aided by an all floating decimal point, with an 8 digit capacity. Features a one button square root key, easy percentage calculation, and a true memory that you can work with. Runs for 18 hours on 2 penlight batteries, or plug it in with the A.C. adaptor. Case included.

CANON PALMTRONIC F-5

Speed and Accuracy with Slide Rule Handiness

Complicated arithmetic calculations are simplified with micro-programmed function keys. Scientific and technical problems take less time by entering your data, and with one touch determining such functions as trigonometric, inverse trigonometric, exponential, logarithmic, power, square root, reciprocal and Pi. The degree radian mode switch is set accordingly when using degree or radian values. A bright 8 digit display with floating decimal point, plus a memory to retain all intermediate calculation results add to its handiness. Operates for 18 hours on penlight batteries, or use it with the rechargeable battery pack. Case included.

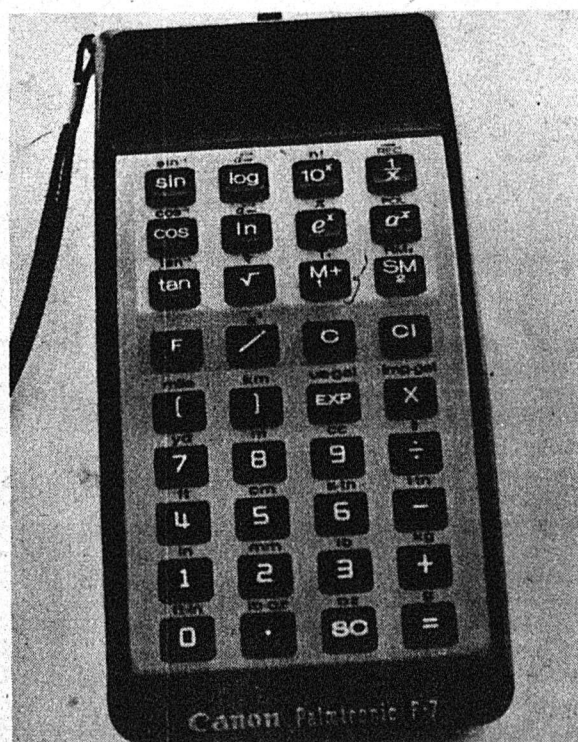

CANON PALMTRONIC F-7

A Wizard to Solve Scientific Calculations

The F7 rapidly performs in the order of the calculation expression. It has 8 digits (mantissa part), mantissa sign, 2 digits (exponential part), exponential sign display totalling 12 digits and two memories, one for storage and the other for accumulation.

Basic calculations of functions are trigonometric and inverse trigonometric, logarithmic, power, square root, cubic root, factorial, constant Pi, conversion of sexagesimal notation into decimal notation and vice-versa, and rectangular and polar co-ordinates. Versatile conversions can be done in length, volume, and weight. The unique fraction key allows you to enter the fraction just as its written expression. Up to seven-fold parenthesis calculation is performed easily. Runs on penlight batteries for 18 hours, or use it with the rechargeable battery pack. Case included.

These, and other fine calculators by Canon, are available at better calculator stores.

All Canon calculators feature a one year warranty, with service done here in Edmonton, as well as Calgary.
